PERSONAL PROJECT

- I have created a Blog website using Django framework in which a user can perform below operations.

1. User can login into the website by entering the registered credentials.
2. User can view the posts after logging into the website.

PERSONAL DETAILS

DOB - 28th April
Nationality - Indian
Status - Single

3. User can create, delete and update the posts which will be stored as a draft. The Posts will be saved in model after user's approval

4. published date will be generated when the user update or create a post.

The above project is placed in my Github. Blog : <https://herokutrail967.herokuapp.com/>

HOBBIES

1. Competitive coding
2. Watching movies / series/Cricket
