- Python
- Apache Tomcat
- Nginx
- Nexus
- Linux

# SHANKAR NARAYAN NS

AWS/DevOps Engineer

## PROFESSIONAL SUMMARY

- AWS and DevOps professional with [number] years of experience designing, implementing, and managing scalable and reliable cloud infrastructures.
- Skilled in AWS services such as EC2, S3, RDS, VPC, Lambda, Route53, CloudWatch, Elastic Beanstalk, and more.
- Proficient in DevOps tools like Git, Jenkins, Ansible, Terraform, Docker, Kubernetes, Grafana and Prometheus.
- Experience writing and managing infrastructure as code using tools like Terraform, and Ansible.
- Expertise in implementing and managing security and compliance standards in AWS using tools like AWS IAM, AWS Certificate Manager, and AWS Config.
- Experienced in diagnosing and resolving issues related to AWS services, DevOps tools, and cloud infrastructure.
- Collaborative team player with experience working with cross-functional teams to deliver high-quality solutions on time and within budget.
- Proven track record of delivering successful projects that meet or exceed business requirements and expectations.
- Continuous learner with a passion for keeping up-to-date with the latest AWS and DevOps technologies and best practices.

## WORK EXPERIENCE

- TPConnects, Dubai 13-03-2019 to Till Today

### PROJECT EXPERIENCE

- Project : HP E-PRINT ENTERPRISE Role : Software Engineer

### ROLES & RESPONSIBILITIES

- Design and implement AWS cloud infrastructures, including compute, storage, network, and security services, using best practices and principles of infrastructure-as-code.
- Develop and maintain automated CI/CD pipelines for deploying applications and updates to production environments.
- Configure and manage DevOps tools, including source code management, build and test automation, and release management tools.
- Collaborate with development teams to optimize software builds and deployments, ensuring high availability, scalability, and security of cloud-based applications.
- Implement and manage monitoring and logging tools, including cloud-based and open-source solutions, to ensure the health and performance of cloud infrastructures.
- Ensure compliance with security standards and policies, including access control, data protection, and network security.
- Develop and maintain disaster recovery and business continuity plans, including backup and restore procedures and failover strategies.
- Troubleshoot and resolve issues related to cloud infrastructure, DevOps tools, and application deployments.
- Continuously improve AWS and DevOps processes and tools, staying up-to-date with the latest industry trends and best practices.
- Document technical designs, procedures, and troubleshooting guides to ensure knowledge transfer and effective collaboration with other team members.
- Provide technical guidance and mentorship to junior team members, fostering a culture of continuous learning and growth.
- Collaborate with cross-functional teams, including development, operations, and business stakeholders, to deliver high-quality solutions on time and within budget.
