Preparing the optimized approach and architecture with the involvement of the Architecture Team.
Going through several types of research for the upcoming technologies to be used in the project.
Dummy works for new requirements in the Project to confirm the compatibility and responsiveness of the technologies including testings on browsers to Mobile OS like Android and iOS; to be used in the future.
Grooming team-mates with technologies, best practices, and architecture.

Skills

Salesforce

This is the backbone of our project. The the whole business is developed on this. My area of expertise here is on the customization like Apex, Visualforce page, Aura and Lightning Web Component.

Skills

Lightning

It is UI field, launched by Salesforce, to add better look-n-fill to their websites. I've been a part of most of the changes related to Lightning.

Skills

Lightning Web Compnents

This is the most recent web standard-based frame work, I have been involved in creating new customized web based component and as well as redesigning the old visual force pages to new lightning web component.

Skills

Accessibility

Access by everyone regardless of disability is an essential aspect - Worked on development of products and services which are accessibility compliance.

Technology Summary
