Project Details

NBFC-North Bridge Financial Corporation

Underwriters Workbench (July 2019 – till date)

Underwriters Workbench ("UWWB") forms part of an org-wide transformation program "Genesis" at Northbridge Insurance Canada, aiming to provide a single, efficient and easy to use "One-Stop Shop" for underwriting with tools for decision making, workflow enhancements and efficient business process & rules management on Pega, leveraging Pega's PUI Framework. (Pega Underwriting for Insurance).

The purpose of this project is to consolidate, rationalize and standardize processes across lines of business for Northbridge Insurance's underwriting function. The goal of this project is to improve the operational efficiency, "Faster Time-to-Market" and to facilitate better Business Oversight & MI.

The intent of this project was to significantly reduce the time to market of new products to achieve increased competitiveness in the market place, build operational efficiency and to bring disparate business areas/systems onto a single platform along with providing support to Northbridge's existing underwriting business/operating model.
