Experience

APRIL 2020 – PRESENT
Full Stack Developer / Dashclicks, Jaipur

Working with the MERN stack to build the following projects:

- **eDocs** – A platform that allows the user to build electronic documents using a drag and drop interface, and also allows the sending, receiving and signing of those documents.
- **InstaSites** – An easy-to-use platform that allows even non-techy users to quickly create websites.
- **CRM** - A platform to create and manage contacts for use by businesses on Dashclicks.
- **Created reusable components** for use across the entire Dashclicks platform.
- **Created microservices** - Integrated CallTrackingMetrics, Namecheap, Hubspot, Salesforce, Zoho, Duda, Active Campaign, Keap, Pipedrive, Constant Contact and Mailchimp into the Dashclicks platform.

FEBRUARY 2019 – APRIL 2020
Software Engineer / Intellect Design Arena Limited, Mumbai

Used various technologies including React.js, Node.js, HTML & CSS, JavaScript and Java to work on the following projects:

- **Digital Banking Platform** (Liquidity Management System): A platform that is used to manage a firm's available cash.
- **Resource Leak Detection Tools**: A software development utility that is used to detect leakage of resources such as memory, network, file resources, etc. The utility was finally used across the entire development team.
- Also determined and planned requirements for project development.

College Project / NIT, Bhopal

e-Commerce Platform: Online shopping platform built using Python 3, Django, MongoDB, HTML, CSS and JavaScript. Worked in a team of 3 people. Learnt about teamwork and collaboration from this project.
