Objective

I am seeking employment with an esteemed organization where I could meaningfully and productively exploit my skills and gain an opportunity to overcome dynamic, rigorous and systemic challenges.

Synopsis

- Performance-driven **Senior Software Developer** with around **3.8 years** of experience in **Oracle PLSQL**.
- Involved in all phases of the SDLC (Software Development Life Cycle) from analysis, **design, development, testing, implementation, and maintenance** with timely delivery against aggressive deadlines.
- Experience in creating **Procedures, Packages, Functions, Triggers views, Cursors, PL/SQL Collections**, and **optimizing query performance** and other database objects using SQL, PL/SQL.
- Developed Complex database objects like **Stored Procedures, Functions, Packages and Triggers** using SQL and PL/SQL.
- Developed huge DML operations using **Bulk collect and DBMS_PARALLEL_EXECUTE**
- PLSQL programming using oracle tools like PL/SQL Developer and SQL plus.
- Good knowledge in **analyzing and resolving in L1 support Issues**.
- Experience in SQL performance tuning using Cost-Based Optimization (CBO).
- **Tuning of SQL Queries** to improve performance of a system. Identify root causes and resolve problems related to system functionality. Experience in numerous Oracle implementations through full infrastructure and performance optimizations including I/O optimization, Testing and Implementation.
- Quick learner of new technologies with flexibility to work under varies conditions.
- Worked for **CAMS (Mutual fund RTA)** which in turn has 14 **AMC clients including HDFC, L&T, BIRLA, SBI, ICICI PRU, KOTAK, IDFC AND DSP**.

Technical Expertise

- Programming languages - Oracle 11g and Oracle 12c.
- Tool - PLSQL developer

Employment Snapshot

- Working as **Senior Software Engineer-Oracle PLSQL** in **Sterling Software Private Limited**. (Oct 17 - till date).

PROFESSIONAL EXPERIENCE

Role	:	Senior Software Engineer
Dept.	:	Software Development and Team coordination
Duration	:	3.8 years

Profile of Siddartha Kuruba

PROJECT

- Name : **Revamping Mutual fund Brokerage process.**
- Members : 30
- Role : To rebuild the entire existing brokerage process with improved performance and flexibility
- Responsibility : To identify the long running query and finetune without changing the objective.
Coordinating with Team leader in assigning tasks to other team members.

PROJECT DESCRIPTION

As an RTA CAMS has **14 clients of AMC including HDFC, L&T, BIRLA, SBI, ICICI PRU, KOTAK, IDFC AND DSP**. Brokerage computation process for these AMCs took very long time as the investor had been grown day by day. So new project to revamp this process was undertaken by sterling. As a software Engineer, I was a key member to this project. I have developed about 5 big packages. Every part of brokerage process has been designed with new approach. After the successful completion of this project whole performance of this brokerage process has been increased substantially.

Employment:

Sterling Software Private Limited (Vendor of CAMS).

Sterling software pvt ltd is software provider for the **CAMS**. **CAMS is RTA (Mutual funds)** and it is having **14 clients including HDFC, BIRLA, L&T, SBI, KOTAK and so on.**

Key Responsibilities

- Provide SQL and PL/SQL development in Oracle 11g/12c environment
- Perform technical reviews of customer requirements, analyses source data, and perform gap analysis.
- Handle production support issues through an established ticketing process.
- Enhance the existing application say tuning long running query, identifying bottle necks and working on alternate options.
- Conduct unit testing, regression testing, and participate in the UAT process.
- Participate in project planning and release management.
- Prepare technical solutions documentation.
- Write technical specifications and test plans as necessary.
- Identify potential issues and limitations, as well as monitor and improve application performance.
- Work with business partners to drive and capture system functional and non-functional requirements.
- Enforcing data integrity using integrity constraints and database triggers.
- Triggers for implementing complex data integrity checks and for auditing tables.

Educational Qualification

Pursued Master of computer application (MCA), GokarajuRangaraju Institute of Engineering & Technology in Hyderabad, 2013 - 2016.
