

CAREER HIGHLIGHTS

- 5+ years of progressive experience in software development as an Angular developer across various product-based industries including SaaS, FinTech, B2B, and B2C sectors.
- Proficient in front-end technologies such as Angular, TypeScript, HTML, CSS and Javascript to build responsive and dynamic user interfaces.
- Experienced in back-end technologies including Node.js, Serverless, AWS Lambda, DynamoDB, and Postgres.
- Familiarity with RESTful API integration and asynchronous programming.
- Skilled in agile methodologies, facilitating streamlined development processes and improved product scaling efficiency.
- Demonstrated ability in leading teams, effectively managing and collaborating with team members to deliver pivotal product features.
- Successfully led the development of complex projects from inception to deployment.

TECHNICAL SKILLS

Frontend: Angular (2 and above), Angular Material, Typescript, Javascript, HTML, CSS and SCSS, Bootstrap.

Backend: Nodejs, Serverless, AWS services.

AWS: Lambda, API Gateway, SQS, EC2, S3, Streams, RDS, Cloudwatch, Secret Manager.

Database: DynamoDB and Postgre.

Analytics and Third Parties Integration: CleverTap, Rudderstack, Firebase, Segment, Razorpay.

Others: Git, Jira, Notion, Jenkins, Postman, RB Tool, Strapi etc.

WORK EXPERIENCE

Highlights

- Owned and built several web tools that played a pivotal role in managing leads, sales, partner program and application marketing
- Integrated RazorPay that enabled faster and secured sales with invoicing system automated (<https://payments.bizanalyst.in>)
- Built subscription modelling that helped management of different subscription licenses for a user
- Built a web tool that enabled the resellers/partners of the application to manage their leads, activate subscriptions/licenses for their users, track their sales, invoicing automations, etc (<https://partner.bizanalyst.in>)
- Managed deployment automation for web applications using Firebase, streamlining processes and ensuring efficient releases. Leveraged Firebase tools to optimise deployment workflows, enhancing reliability and scalability of web projects.
- Expertly translated product requirement documents (PRD) and Figma designs into efficient, high-quality code, ensuring seamless development and delivery of web applications that precisely meet product requirements.
- Instrumental in driving product growth from 4k to 200k paid customers through strategic development initiatives, including feature enhancements, scalability improvements, and performance optimisations, resulting in significant market expansion and increased user adoption.

Khatabook, Software Development Engineer II, Bengaluru

Mar 2022 - Dec 2023

- Implemented JWT token-based authorization and authentication for various Biz Analyst products.
- Developed Coin/Wallet purchase and management system to increase ARPU.
- Built a web application facilitating customers to accept payments from third parties for pending bills.
- Automated license/credit purchases for resellers/partners by integrating RazorPay and automating their invoicing.
- Worked with more than 10 software engineers of deferent skills and 3 QA engineers.

Tech Stack: Angular 8 and above, Typescript, Javascript, HTML, CSS, Node.js, Serverless, AWS Lambda, SQS, API Gateway, EC2, S3, Streams, Cloudwatch, Secret Manager, DynamoDB, Postgre etc.

SiliconVeins Private Limited (Acquired by Khatabook), Associate SDE II, Mumbai

Jul 2018 - Feb 2022

- Built the reseller/partner web application from scratch that helped them for tracking sales and managing leads. Played a pivotal role in conceptualising and building this solution. Currently there are more than 4k resellers/partners using the portal generating a revenue of more than 1.5 crore every month.
- Built a payment portal web application integrated with RazorPay that helped our customers to directly pay us for the subscription and other services which were also automated with invoicing systems. (<https://payments.bizanalyst.in>)
- Built subscription management web application which listed the license list for a user
- Built an auth web application that acted as an entry point to different web applications. It helped in authorising and authenticating the user which is trying to use different web applications. (<https://auth.bizanalyst.in>)
- Built the product website (<https://bizanalyst.in>)
- Worked on the backend for creating REST APIs that were required to be integrated on different web applications.
- Worked closely with other team members to identify and remove software bugs.
- Worked with more than 5 software engineers of different skills.

Tech Stack: Angular 7, Typescript, Javascript, HTML, CSS, Node.js, Serverless, AWS Lambda, SQS, API Gateway, Cloudwatch, DynamoDB, Postgre etc.

Tricon Solutions, Intern, Lucknow

Jun 2017 - Oct 2017

- After the graduation joined as Intern and worked on a prototype project for digital healthcare platform.

Tech Stack: Angular 2, HTML, CSS, Bootstrap, Typescript, Javascript, Node.js, SQL etc.

EDUCATION

B.Tech: Information Technology [GPA: 7.8]

2013 - 2017

Dr. A.P.J. Abdul Kalam Technical University.

ADDITIONAL STRENGTHS

- **Ownership:** Demonstrated ability to take complete ownership and deliver robust products.
- **Problem-solving and analytical skills:** Positive attitude towards diving deep to find effective solutions, contributing to successful project outcomes.
- **Collaboration:** Effective collaboration within and outside the team.
- **Time Management:** Skilled in prioritizing tasks, managing deadlines, and multitasking effectively to deliver projects on time and within budget.
- **Continuous Learning:** Enthusiastic about continuous learning and self-improvement, regularly enhance skills and knowledge in software development.

DECLARATION

- I hereby declare that all the above-mentioned information is correct to the best of my knowledge.
