PROFILE

As a Salesforce developer, I have 1.5 years of experience in designing and implementing custom solutions on the Salesforce platform. My expertise lies in the development of custom applications, integration with external systems, and deployment of solutions for clients. I have a deep understanding of Apex, Visualforce and as well as experience in creating and customizing Salesforce objects, workflows, and validation rules. I am also well-versed in data migration and have successfully completed several data migration projects from various legacy systems to Salesforce. And I am also a trailhead ranger.

WORK EXPERIENCE   2021-2023

SALESFORCE DEVELOPER

Nexan Tech IT Solution

Key Skills : -

- Developed APEX triggers, Classes, Test methods & Visual Force pages to display alert messages and tasks to be done.

- Implemented pick lists, filed dependencies, lookups, masterdetail relationships, validation and formula fields and customization.

- Worked on Custom objects, Static resources, Page layouts, Workflows, Validation rules, Custom settings, Custom labels, etc.

- Defined lookup and master-detail relationships on the objects and created junction objects to establish connectivity among objects.

- Designed and deployed Custom tabs, validation rules, Approval Processes and Auto-Response Rules for automating business logic.

- Configured Profiles and Administrative permissions to grant/deny users access to platform features.

- Designed and implemented numerous apex classes to manipulate existing org data using SOQL while navigating around governor limits.
