Prashanthi Madathala

Designation : Systems Engineer

Address   : Boduppal, Hyderabad.

Contact No. : +91 7757841956

Email Id   : shanthi.mtd7@gmail.com

LinkedIn   : www.linkedin.com/in/prashanthim7

Motive

To live honest and to work in a stable organization which fetches rewarding career. Seeking role, where skills and work experience can be yielding in project management. Self-driven SQL Developer with 5 years orchestrating high-performance programming and database solutions aligned with business objectives. To make Innovative development and troubleshooting of application products, supporting attainment of service and financial objectives.

Skill Set

DATABASE	Versions 11g and 12c of Oracle PLSQL Developer
PROGRAMMING LANGUAGES	Oracle SQL & PL/SQL, Python
OPERATING SYSTEMS	Unix, Windows
ETL TOOLS	IBM Data stage , Informatica Power Center
REPORTING TOOLS	R studio, SAP business Objects

Professional Summary

- Joined **Tata Consultancy Services Pvt Ltd**. Pune on 14-March 2016 as '**Assistant System Engineer**'

Project Experience:

🞣 Genesys

        Client   : Citi Bank

        Role   : Datastage Developer

        Tools   : IBM Infosphere Datastage and Quality Stage

Responsibilities :

- Designing and building scalable DataStage solutions.
- Configuration of clustered,distributed and scalable environments.
- Updating data within repositories and data warehouses.
- Assisting project leaders in determining project timelines and objectives.
- Monitoring jobs and identifying bottlenecks in the data processing pipeline. Providing production support to all DS jobs.
- Testing and troubleshooting problems in system designs and processes. Improving existing ETL processes for the business.
- Schedule and plan all data stage tasks accurately to achieve 100% job success.
- Promoting support to customers about issues relating to the storage, handling, and access of data.

🞣 Leaves and Benefits

        Client   : Ultimatix

        Role   : Database Developer

        Database : Oracle 12c

        Tools   : PLSQL Developer

Responsibilities:

- To maintain and adjust the leaves according to the location, which helps users to get the correct payment.

- Data Postage to other applications using ETL and database links.

- Timely and effective communications with users/Business Analysts on requirement progress and deployments.

- Conducted and assisted in 80% unit, performance and integration testings.

- Working in pure scrum/Agile development environment.

- Good hands on Procedures, Functions, Ref Cursors.

- Gathereing detailed project requirements with sound understanding of business impact.

- Fetching Performance files of Database objects through Unix shell scripting and interpreting through UNIX logs

- Cultivated strong and trusted relationships with stakeholders and peers.

- Performance tuning of complex SQL queries and stand alone Producers using context switching and Explain plans.

- Experience in handling CI-CD pipeline and Change request deployment process.

RIGHTS – Access Management System
      Client   :   Ultimatix
      Role   :   Database Developer & Production support Executive
      Database : Oracle 11g
      Tools   : PLSQL Developer

Responsibilities:

- Primary objective of this project is to maintain centralized database of employees Offshore Development Center (ODC) entry/exit access.
