- SSC from Maharashtra State Board with an aggregate of 47.69%: 2006

Technical Skills: -

- **Language:** C#, VB
- **Technology:** MVC WEB API, ASP.NET, AJAX, ADO.NET, LINQ
- **Web:**   HTML, CSS, JavaScript, Angular 6
- **Development Tools:** Visual Studio 2019
- **Databases:** SQL Server 2018
- **Operating Systems:** Windows10, Windows7.

Project Experience

1. **Project Name: Microplanning (MPT).**
   Company Name: Precision Automation & Robotics India Ltd. (Wipro PARI)
   Environment: C#, ASP.NET, SQL Server 2012, MVC Web API, Ajax, JavaScript, Third Party Controls- DevExpress
   Role: Developer, Task Manager
   Description:

   This is a Web-Based Application made for PARI. This is now being used by people from various departments of the company and the top management as well. This application is useful for all because of its various kinds of features like creating and updating Tasks, Meetings, Project Plans, Leaves Management, assigning Activities to resources, logging

issues, shift logs, Timesheet, Review Points, OTags, etc. and viewing its various reports as well. This application also includes a module for the HR and ER department.

2. **Project Name: Productivity Synthesis Solution.**
   Company Name: Precision Automation & Robotics India Ltd. (Wipro PARI)**.**
   Environment: C#, ASP.NET, SQL Server 2012, MVC Web API, Ajax, JavaScript, Angular 6 and Third Party Controls- DevExpress
   Description:
         The Productivity Synthesis Solution is a system used for analyzing the performance of the products. The main objective of this project is to calculate the machine cycles and the states of those cycles. In this project, we work on the PLC input to calculate the productivity of the work of machines as well as showing the errors of machines. The key point of this project is that log data using a data logger, calculation of productivity & performance, generate alerts, alarms, recommendations of the machines, and giving detailed reports and graphs.

3. **Project Name: Cycle Time Calculation.**
   Company Name: Precision Automation & Robotics India Ltd. (Wipro PARI)**.**
   Environment: C#, ASP.NET, SQL Server 2012, MVC Web API, Ajax, JavaScript, Angular 6 and Third Party Controls- DevExpress
   Description:
         Cycle Time Calculation system used for calculating accurate cycle time of Robot, Gantry and Machine. Users can easily write steps and interlocking formulas for simulation. Multiple charts are available e.g. line chart, Gant chart, so an engineer can analyze the cycle time using charts

4. **Project Name: Proposal System.**
   Company Name: Precision Automation & Robotics India Ltd. (Wipro PARI)**.**
   Team Size: 2
   Environment: C#, ASP.NET, SQL Server 2012, Ajax, JavaScript, Third Party Controls- DevExpress
   Description:
         Proposal System is a very powerful 'Sales Pipeline' designed to manage projects. There are three modules: Sales Pipeline, Quotation, and Proposal. This system creates a potential project and these projects divide into sales teams. Proposal system work on wholesales pipeline from potential project to a sale project. There is available functionality to assign tasks to the sales team as well as status management. It includes multiple statuses for a project like status A for a handshake with a client, status P for Purchase Project, and L for a lost project.

5. **Project Name: explosionlondon.com**
   Company Name: Calyx Solutions, Kolhapur.
   Team Size: 2
   Environment: ASP.Net, C#, HTML, CSS, AJAX, JQuery, MS SQL Server 2008
   Description:
         ExplosionLondon is an ecommerce website for selling products. It includes the functionality of Online Payments, Order Management, Offer Management, Customer Login, Adding and Editing Address Books of Customer. Includes Shopping Cart, and sharing Products on Facebook and Twitter.
