- Created and used email templates in **HTML** and visual force.
- Used the sandbox for testing and migrated the code to the deployment instance after testing.

Salesforce Environment Worked On: Salesforce CRM, Data Loader, Migration Tool, Validation Rules, Approvals, Reports and Dashboards, Triggers, Scheduled and Batch Apex, Visual Force Pages Lightning Pages.

Project #3:

Name of the Project: DAKSH – Clean Affordable Mobility

Company Name: XALT Energy

ROLE: Salesforce Administrator

Team Capacity: 5

Description of Project:

The main aim of the Project is to afford the Clean and Green Energy in affordable price to the End customer. For that the Company need to maintain lot of data and requires Reports, Data Tables, Contacts of their clients, Track of Leads, Opportunity calls and Tasks.

For this, the project has been developed and customized fully in Salesforce.com, where the Sales and Service team of their Company can login into the customized SFDC application and track their Leads, Contacts of their Customer Database. The Sales team can enter their customer contacts, Send them the remainder Emails and alerts about the Product Development on regular basis. The Service team can track the Service Calls and any complaints registered via Chatter. Here, We have created profiles, Custom Objects and Fields for the SALES Team, SERVICE Team and owner being their Project Manager. We have designed Lightning App for their purpose and also a Mobile APP which can also allow the respective team to punch their details.

Roles & Responsibilities in the Project:

- Created **Custom objects, fields, Validations, Workflows and Custom Object Tabs.**
- Worked on various salesforce.com standard objects like Accounts, Contacts, Cases, Opportunities, Leads, Campaigns.
- Designed and deployed the **Entity-Relationship data model, Validation Rules, Workflow Rules, Auto-Response Rules, Page layouts, Components** to suit to the needs of the application
- Customized Page layouts for **Opportunity, Contacts, and Accounts** depending upon user roles, and Groups
- Used Salesforce **Data Loader** for insert, update, and bulk import or export of data from Salesforce.com SObjects. Used it to read, extract, and load data from comma separated values (CSV) files
- Defined **Lookup and Master-detail relationships** on the objects and created junction objects to establish connectivity among objects
- Created **Workflow Rules** and **defined related tasks, time triggered tasks, email alerts**, filed updates to implement business logic
- Created **Templates, Approval processes, Approval page layouts** and defined **Approval actions** on them to automate the processes.
- Build **Reports, Dashboards.**
- Customized **Marketing, Sales** and **Service** applications to create a web to lead forms, Campaign to lead forms, assigning tasks, and managing workflows.

- Defined **lookup and master-detail relationships** on the objects and created **junction objects** to establish connectivity among objects.
- Implemented web based **Case Management Automation** – Web to Case (on Case Object) to track and solve customer`s issues.
- Implemented **Record-Level and Field-Level security** and configured their sharing settings
- **Opportunity, Leads, Account, Contacts Management.**
- Involved in preparing **Business Requirement Document** and **Functional Requirement Document.**
- Responsible for setting up **login restrictions** and **resetting** the user passwords
- Implemented **public access settings for sites, restricted login hours, and restricted login IP ranges** on profiles.
- Worked closely with sales team and business analysts and performed detailed analysis of business and technical requirements and designed the solution by customizing various standard objects of Salesforce.com (SFDC)

Salesforce Environment Worked On:

Salesforce CRM, Apex Classes, Apex Triggers, Apex Batch classes, LWC Pages, Work flow, Deployment, Salesforce reports/Dashboards. Data Loader, Workbench, PostMan for the Integration (REST), HTML, XML, CSS, java script, Eclipse IDE plug-in, Salesforce CPQ, Data Migration, Salesforce Classic Interface.
