

# Dinesh Kumar

Software Engineer

I have been working in Infosys since the last 18 months and I am going for a change as I always enjoyed learning ReactJS and NodeJS. I want my career to move forward in Full Stack Developer.

## PERSONAL PROJECTS

### Task Assist (02/2019 - 05/2019)

- It is a web application that helps employees of a company to post a task required to be completed on to the website.
- Other employees of the company who are interested to complete the task can apply for it.
- The website is developed using ReactJS for the frontend and NodeJS for the backend and MongoDB for database.

### CDK Global (08/2019 - 01/2021)

- Worked in a CDK(client) project as a developer which uses their own proprietary language.
- Language used: KCML (KCML is a combination C and C++) It is a web application which manages the interaction and stores the data between the clients and customers in the automobile sector.
- It is monopoly business and so it is used by almost all car dealerships (including 3rd party dealerships)

### BloggersWorld (09/2020 - Present)

- It is backend project created using NodeJS and MongoDB for database.
- It consists of functionalities such as Login, Register, Create Blog, Update Blog, Update Profile.
- It is posted in github. <https://github.com/dineshdvn/bw>.

### ConnectiFy (01/2020 - Present)

- It is web application where user can login and create posts.
- It consists of both Frontend and Backend.
- Technologies used are ReactJS for frontend, NodeJS for backend, MongoDB for database.
- It is posted in GitHub. <https://github.com/dineshdvn/Connectify>.
