WORK EXPERIENCE

Salesforce Developer | Analyst

Deloitte Consulting USI

📅 Dec 2017 - Present 📍 India

- Designing and developing efficient and robust client solutions under Agile methodology, using latest Salesforce tools & techniques.
- Developed dynamic screens using Lightning Flows to capture question set details.
- Developed Trigger and Apex logic for business requirement.
- Developed custom Data-table using Aura Component to display associated details in a single screen and also perform operations on it from the same screen.
- Performed collaborative root cause analysis of production and pre-production issues.
- Developed a solution, using Salesforce Aura components, LWC, Config, Reports and Dashboards, to manage and plan resource capacity of upcoming Sprints.
- Developed interactive chat bot using Einstein Bot feature to solve user queries and integrated it with Service Now to create and track related Incidents through Chat Bot.
- Built lightning community for external users.
- Used LWC (Lightning Web Components) to build custom functionality in lightning community.
- Used LWC to build custom Lookup, Multi-select, Multi-select with search functionality and dynamic options based on related child records.
- Integrated Salesforce with Microsoft SharePoint to send files from Salesforce to Sharepoints.
- Integrated Salesforce with AWS s3 bucket to send files from Salesforce to AWS s3.
- Created Connected App and wrote RestResource class to allow external system to interact with Salesforce org.
- Used ANT migration tool and change sets for migrating metadata from sandbox to Production org.
- Used Dataloader to perform multiple Data migration activities.
- Used Stash and Bit Bucket repositories for maintaining code versions.
- Worked on JIRA and Confluence for User Story tracking.
