PROJECT #1
Industry : Manufacturing
Role : Senior Salesforce.com Developer/Team Lead
Environnent : Salesforce.com, Community Cloud
Project Description:
Quotation Management Tool to replace their existing legacy Q2C System.
Responsibilities:
- Worked on Client Location.
- Successfully delivered Demos and got appreciation.
- Maintained complete documentation on JIRA. Covered all apex classes up to 85%.
- Migrating existing screens to Lightning components.
- Effort estimation, taking up tasks and meeting deadlines.
- Mentoring of teammates to upgrade their technical skills in project.
- Taking ownership and completed quality and timely deliverables
- Divided tasks among team members, maintained trackers up to date.
- Designing architecture for Lightning requirements for Lightning Components.
- Worked on Big Objects to facilitate huge volume of data requirement for the client.
- Implemented Lightning Out as a bridge between Visualforce Pages and Lightning Components.
- Worked on Platform Events to facilitate custom notifications depending on the real-time event data.
- Maintained code coverage for over 85% at all time.

PROJECT #2
Industry : Employee Management
Role : Senior Salesforce.com Developer/Team Lead
Environnent : Salesforce.com, Community Cloud
Project Description:
Internal Portal for Employees to fill timesheets, raise leave requests, update their skills and other day-to-day activities.
Responsibilities:
- As Team Lead/Architect I was responsible for assigning tasks to the team, took care of daily scrum calls , weekly meetings and demos.
- Implemented Sandbox Migration Process.
- Fixed bugs/Support Requests on a daily basis.
- Implemented Reimbursement Module so that employees can raise the reimbursement requests, get approved and track in the portal itself.
- Implemented Partner Community for Sales Team for better tracking of Leads/Opportunities and their Report Generation.
- Implemented Utilization and Revenue Metrics functionality which helps the management to go over the Utilization and Revenue metrics company wide, project wise and employee wise. This in turn helped them for better resource allocation so that no resource is over/under utilized.
- Developed the timesheet reminder functionality to send reminders and escalation in case anyone didn't fill the timesheet for a week or two looping in their mentors.
- Implemented Project Module which basically bridges the gap between Sales Team(Partner Community) and Implementation Team(Customer Community).
- Implemented a different Portal where the Contractors will be able to fill the timesheets, raise leave requests.
- Responsible for maintaining User Documentation, Technical Design documentation for all the modules.
- Responsible for maintaining the code coverage of 85% and more for all the modules at all time.

PROJECT #3

Project Description:
Worked for one of the best University's business school located in Toronto, Canada that offers undergraduate and graduate degree and diploma
programs in business administration, finance, accounting, business analytics, public administration and international business as well as number of
PhD. and executive programs. Recruitment App is built for the Automation of recruitment process for 22 different graduate and post-graduate programs of the Client. It includes Lead Management, Application management. Force.com Community Licenses were procured for the Applicants to Login. Customized Force.com community login screens, mobile responsive Application Screens built using Bootstrap CSS and Application Management Tabs are part of the Portal.
Responsibilities:
- Took care of the Project implementation and Client calls on daily basis.
- Leading a team of two members.
- Delivered the client project on-site at Client's location – Canada.
- REST Based Web Service implementation with KIRA Talent for student Video Interview process.
- Helped in preparing Technical design document and User success story.

PROJECT #4
Industry : Health Care and Life Sciences
Role : Senior Salesforce.com Developer/Team Lead
Environnent : Salesforce.com
Client Description: Client is an American multinational biopharmaceutical company. The Comprehensive Compliance Control (C3) system will be a new central system for managing and approving compliance requests for establishing contracted relationships with independent parties external to Client. The system then supports the ability to enable the contracting process with external third parties to define the final terms of relationships.
Role: As a developer worked on the below items:
• Developed Apex Classes, Custom Controller and JavaScript for various functional needs in the application.
• Worked on Various Objects, Workflow Rules
• Worked on Custom Settings and Custom Buttons.
• Setup Record Types, various validation rules on the Fields, Page layout setup, Email Alerts, Email Templates.
• Worked on Unit Tests and code coverage according to Force.com best practices.
• Created Workflows and Time dependent Workflows.
Technical Environment: APEX Classes and Test Classes, VF, SOQL, SOSL, Configuration side, Data Loader, Change set.
