PROFILE SUMMARY

Software Developer works in design and development of web and desktop applications. As a **full stack developer** with extensive exposure to JavaScript based applications, backend and libraries.

EDUCATIONAL QUALIFICATIONS

Program	Institution	%/CGPA	Year
B.Tech. ECE	YMCA Faridabad	9.127	2013
XII	NYPS Hisar (CBSE)	82.2%	2009
X	Vishvas High School (HBSE)	10	2007

TECHNICAL SKILLS

- Good understanding of C, Data structure & Algorithms.
- Front-end: Vuejs, Javascript, Electron framework, HTML, CSS integration, Webpack,JSON.
- Back-end: Rest API,Node JS, Express, MongoDB, Swagger, Unit testing(Mocha).
- Dev Ops: Docker, Jenkins, AWS.
- Tools: Git, Jira, Static code analyzer.

PROFESSIONAL EXPERIENCE

Monotype India	Aug 2016-Current	Web and Desktop application.
Cognizant India	Nov 2014-July 2016	Backend developer
Egain Communications	July 2013 – Nov 2014	Automation framework development
ST-Microelectronics (Trainee)	July 2012-Dec 2012	System level work.

PROJECT WORK

- **Senior Software Developer (Monotype):**
  Project: - Monotype Desktop application
  Technology: - Vuejs, vuex, Electron framework,HTML, Vue-cli.
    - Design,implementation and development of desktop apps using electron framework.
    - Implemented multiple feature login, dashboard, proxy,troubleshoot,managing user assets,inter process communication, events handling.
    - Involvement from requirement gathering , estimation to final delivered stage of product.
    - Debugging and Bug fixing on customer environment & client interaction.
    - Created extension for adobe apps using CEP resources.
    - Experience in development of desktop apps in a beta environment with fast delivery.

  Project: - Enterprise Web application
  Technology: - Vuejs, Graphql client, vuex,vue-cli.
    - Design,implementation and development of web apps.
    - Responsibilities include developing, maintaining and enhancing features for Monotype website (enterprise.com, fonts.com).
    - Building large scale Applications capable of handling and rendering large and complex datasets.
    - Collaborate with product manager, UI/UX designers and API developers.
    - Unit testing done using chai, sinon.

Project: – Rest API development for myfonts.com
Technology: - Node.js, Express, MongoDB,Swagger,Unit testing(chai).
- Develop, design & implement Rest API using express framework.
- API documentation using swagger.
- Integrated mongoose for managing data.
- Created API for various user flows - login, cart ,order,dashboard and admin APIs.

- **Programmer Analyst (Cognizant):**
  Project: - API development
  Technology: - Node.js, Express, MongoDB,Swagger.
  - Develop and implement REST API using express framework.
  - Database integration and api documentation.
  - Interact with UI developers to gather the requirements.

- **Software Engineer (Egain):**
  Project: - Automation framework development.
  Technology:- JAVA,Maven
  - Implemented the automation framework based on task and task manager approach to automate the REST API.
  - Framework includes features like logging, reporting, Data driven tests
