## Profile

Proficient and skilled Backend Engineer with proven track record spanning over 7 years. I am tech enthusiast who likes to lead a team to develop end to end applications that will solve customer challenges and make business run efficiently.

## Experience

- Xpressbees** May - 2022 - Oct - 2023  
Senior Software Engineer
  - As a project lead created two applications right from scratch. They are designed as scalable microservices which cater to logistics space.
  - I was involved in ideation and implementation of Java Backend and frontend system. Created phased release strategy so new system will replace Legacy system without breaking existing system.
  - Helped developers to implement functionality smoothly by solving all technical and functional challenges.
  - Implemented backend functionality in Java Spring boot, MongoDB, PostgreSQL, AWS cloud. Reduced latency , removed clutter of legacy APIs by creating generic APIs and added caching mechanism.
  - Involved in Sprint planning, Story creation, Scrum and API integration and release tasks.
- Oracle Cerner** June 2018 - May 2022  
Software Engineer II
  - Worked in Cerner millennium Pharmacy applications and built Java RESTful services and C# desktop applications.
  - I have mentored new joiners in team. Guided new joiners to build CCL-to-Java migration project. I was involved in investigation of project implementation required and provided design of user stories. Guided peers to solve code issues.
  - Built MedWeb application as part of Hackathon. It displays medication details to patient in Web Portal by using Java services and React.
- Societe Generale** August 2016 - May 2018  
Software Engineer
  - Worked in C# winforms Desktop applications and WCF Services in data warehouse project in Societe generale Bank.
  - Involved in Non regression testing and Acceptance testing.

## Education

- Bangalore Institute of Technology, Bengaluru | VTU** 2016  
MCA  
74.69
- MGM College, Udupi | Mangalore University** 2013  
BCA  
80.99

## Skills

- Java
- Spring Boot
- PostgreSQL, Oracle
- C#

- AWS - EC2, SQS
- MongoDB
- GraphQL
- RESTful services, Microservices
- Redis cache
- Maven
- Agile
- Git, SVN, Jenkins
- Docker

## Projects

- ◦ As part of ExpressAthon built GraphDb implementation to find shortest and cost effective path between cities to help logistics transportation.
- ◦ Built Currency exchange in microservices model using Spring Boot and Spring Cloud.

## Certifications

- Front End Web Development with React - By -The Hong Kong University of Science and Technology, Coursera
