## Experience

**SOFTWARE DEVELOPER** | 08/2018 to Current

**Valuefy Solutions - Mumbai, MH**

**BIMB Bank(Bank in Malaysia)**

- Handled the whole backend for this project and made all the API using Elastic Search.
- Some of the main features I have worked on are a full analysis of a fund and calculated every ratio for a every fund by which customer can understand how a fund will perform.

**Customer: Waterfield Advisor Project**

- Family Office Reporting, Handled the whole backend for this project and made Investment Mandate for this bank.
- I was fully responsible for the whole project and worked on Frontend and Backend.

**JUNIOR SOFTWARE DEVELOPER** | 01/2018 to 08/2018

**Ontro - Chennai , Tamil Nadu**

I had made the app in React Native and also working as a Backend Developer on a live SaaS project in Node js .

Made backend for many modules of the app like login authentication , sending email and sms to the users designed the database also , increased the performance of the app.

Tech used : Node Js , React Native, Mysql, Sequelize ORM library, git

## Education and Training

**Jaypee University - | Bachelor of Engineering**

Engineering and Technology, 2018
