## 📁 Experience

- 9 years of experience in designing and developing the end to end systems in banking, trade, insurance, information and media.
- Object oriented and functional programming enthusiast, loves solving puzzles and algorithmic problems in java.
- Follows Agile mindset, I have lead the team and also trained new members on the java and NOSQL technologies.
- Working with customers to resolve technical issues.

## Innovation

- Automated code review process by creating a tool to check code quality, performance analysis and code complexity. It reduces code review time from hours to minutes. ***I am the individual contributor for this project.***
- Maximized customer value and improved service level performance by automating the content loading monitoring process, this application reduces 20 developer's effort to 4.

## 📁 Projects

08/2019 – PRESENT CHENNAI, INDIA

### Technical Lead Standard Chartered GBS

- Designed and developed the dashboard to monitor the health of a product, specific process and manage application capabilities.
- It reduces the application monitoring time and leveraged performance and decision making.
- Followed the Microservices patterns to implement the service level features.
- Other responsibilities included in communicating with stake holders, code reviews and fixing the production issues.

Tech Stack:

Services: Java 8, spring boot, spring MVC, Hibernate, Spring batch, Restful Webservices, Junit/Mockito,  
FrontEnd: React js, typescript, javascript, CSS.  
Persistence: Oracle 11g  
Server: Jboss 7.0

## 📁 Projects

05/2019 – PRESENT INDIA

### Technical Lead Standard Chartered GBS

- Developed workflow management user interface product capabilities for the payroll system using ember.js, tabulator.js and javascript.
- Implemented service level features using Sprint Boot, Hibernate, JPA on java 8 platform.
- Designed and developed database features in oracle in a configurable way.

Tech Stack:

Services: Java 8, spring boot, spring MVC, JPA, Restful Webservices, SOAP webservices, XSLT.  
FrontEnd: Ember.js, Tabulator js, Javascript.  
Persistence: Oracle 11g  
Server: Jboss 7

01/2017 – 04/2019 CHENNAI, INDIA

### Full Stack Engineer Cognizant Technology Solutions

- Developed Titan notifications module using spring boot micro services architecture.
- Developed Titan Notifications and Tasks portal using Angular, Java Script and Bootstrap.
- Implemented back-end features of a web application using spring boot and hibernate frameworks.
- Designed and developed database futures on SQL database.

Tech Stack:

Services: Java, spring boot, spring MVC, Spring Data, Restful Webservices.  
Middleware: TIBCO  
FrontEnd: Angular 5/6, Bootstrap, Javascript.  
Persistence: SQL

12/2014 – 01/2017 CHENNAI, INDIA

### Senior Developer Cognizant Technology Solutions

- Implemented the Titan Cash settlement feature using spring boot micro services.
- I was in the Titan Cash Settlement team that was responsible for creating cash settlements using customer invoices with bank payments,
- I lead the effort to build a feature that allows to settle payments using job scheduler.
- My responsibilities included the analysis and coding, unit testing, and supporting.

TechStack:

Service: Java 8, SOAP webservices, Springboot,

## Projects

Spring MVC, Spring data,  
Spring batch, Hibernate.  
Middleware: TIBCO  
Persistence: Oracle

08/2011 – 07/2014 CHENNAI, INDIA

### **Software Developer** **Cognizant Technology Solutions**

- Content processing application, this module performs multi-step processing and enriching data, which is useful to legal departments in the USA.
- Worked closely with customers while gathering requirements, and I had lead the team and effort in coding, supporting team members, development and testing.

Tech Stack:

Service: Java, MarkLogic API, XQuery  
Middleware communication: RESTful webservices.  
Deployment: MarkLogic, Jetty Server.

08/2011 – 07/2014 CHENNAI, INDIA

### **Software Developer** **Cognizant Technology Solutions**

- The XQuery Review plugin helps to review the MarkLogic, XQuery and XPath code.
- This plugin identifies coding standards and performance issues.
- Using this tool, the developer can identify the issues at the time of development.
- I am responsible for end to end execution of this project.

TechStack: EclipseAPI, Core java, Eclipse UI features, JFreecharts.

## Education

04/2006 – 05/2009 TIRUPATHI, INDIA

### **Master of Computer Applications.** **Sri Venkateswara University**

GPA: 74%

## Skills

### – SERVICE DEVELOPEMENT

Java/J2EE 

Spring Boot, Spring MVC, 

Hibernate, JPA 

JMS, TIBCO, Kafka 

MarkLogic, XQuery, XPath 

RESTful, SOAP 

webservices 

Hadoop, spark, pig, AWS 

cloud 

## Skills

### – UI DEVELOPMENT

Angular 5/6, JavaScript, 

BootStrap, Ajax, React Js 

### – DATABASE

Oracle 

MarkLogic, MongoDB 

### – SKILLS WITH STRONG KNOWLEDGE

Hadoop/Spark 

### – BUILD ENVIRONMENT

Ant, Maven, Team 

City(CI/CD), GIT 

### – CLOUD ENVIRONMENT

AWS Cloud 

## Awards

- In the Current project received the spot award for automating the dashboard.
- In Cognizant Received Global innovation award for automating code quality process for MarkLogic/XQuery language.
- Recognized as the best innovation project for automating monitoring process in the organisation.
