## Projects

## Executed

### Liviano Universe (Dynamic template)

- Client : (<https://www.livianouniverse.com/>)
- Languages & Technologies: HTML5, Scss, ES6, Node JS
- Tools Used : Visual Code, GIT.
- Description :
  - Liviano Universe Dynamic Template is an in-app Ad Serving Platform. It would render different ad Packages with JSON data at run time. Supported on android OS 4.2.0+, Ios and Windows OS. We also provide support in running our Dynamic packages templates off-network on all **MRAID (Mobile Rich Media Ad Interface Definitions)** complaint SDKs.
- Responsibilities :
  - Working as a Team lead.
  - Template design analyzing and estimates.
  - Code review, development and merging PR to deliver product.
  - Documentation, following process and audit.
  - Client communication.
  - Single handedly supported Dynamic Ad templates on MRAID complaint off-network SDK.

### **Liviano Rooms**

- Client : Liviano (<https://www.livianorooms.com/>)
- Languages & Technologies: Scss, ES6, React JS, Node JS.
- OS : windows 10.
- Tools Used : Visual Code, GIT.
- Description :
  - Liviano is a travel base company. In liviano I have designed all the UI. In liviano we have done API integration like Hotel , Flight , Car, Insurance, Bus, Forex card. have created their own portals with api from companies like TBO, amedus. We are still working on it.
- Responsibilities :
  - Took part in requirement understanding, development and maintenance.
  - Writing Unit test cases
  - Maintaining code quality

### **Nemo**

- **Technologies:** React Native , Node Js, Postgresssql.
- 
- **Description**

Nemo is a third party app of ICICI Bank. In this I have worked on user profile update. The user should be able to change his profile image. And documents for loan. Also credit, debit, looking for loan and check whether the user is eligible for loan and e-mail should be sent.

### **PEACE**

- **Technologies:** React Native , Node Js, Postgresssql.
- 
- **Description**

We have developed a PEACE application. It has 2 parts, admin and user. admin can upload your blog. can also purchase purchase blogs and some default blogs. So user can login and read default blog. But paid blogs have to be purchased. There are also chat options in admin and user etc.
