## WORK EXPERIENCE

### SFCC Developer PFSWeb

02/2016 - 01/2018

Bangalore, India

*Achievements/Tasks*

- Project: London Drugs, Saje.
- Key Areas: Business Manager configuration, Job scheduling, Merchandising tasks, Campaigning and promotion configurations, etc. Administrative tasks like Code and data replication, Data import/exports, etc.
- Worked in projects like London Drugs, Saje etc. in my initial career start. Learned Demandware technology with hands-on experience in multiple customization and core concepts of Demandware. Also, worked with multiple customization like Product, Home, and checkout pages with overall deployment process of the project.
- Saje was a managed service project where initially I worked as a developer under team lead and later on took responsibility and worked as a lead developer and handled and successfully launched many redesigns, Enhancement requests as well as bug fixes.

### SFCC Developer LiveArea, a PFSweb, Inc. Brand

02/2018 - 05/2019

Bangalore, India

*Achievements/Tasks*

- Project: Gander Outdoors, Uniqlo
- I worked in the Gander Outdoors project as a senior developer where I worked with multiple customizations on top of site genesis like PDP page, customized checkout flow, shipping methods, and integrations, like PayPal, Avatax, Bazaarvoice, OMS, DIS, etc.
- Worked and learned Bit Bucket functionalities, Build scheduling, Code and Data Replications, Meta Data creations, Job Scheduling, Catalog configurations, Content Management, project processes and requirement analysis.
- With talented team members, I have improved my communication skills and team management skills.
- Worked as a lead developer in the Uniqlo project where I successfully handled and delivered multiple enhancement mini projects and improved my team management skills.
- Got an award for Employee of the Quarter.

## WORK EXPERIENCE

### Salesforce Certified B2C Commerce Associate Technology L2

Publicis Sapient

06/2019 - Present

Gurugram, India

Achievements/Tasks

- Project : Loreal
- Loreal is a multi-brand project where 50+ brands are running simultaneously on LORA(Base site developed on site-gensis).
- Initially, with Loreal, I have worked on the support track with managed services work like change requests and bug fixes. I also learned the process of managing 50+ brands under loreal projects to manage and process from initial development to the production push including PR processes and project data management.
- Gradually, I moved to the mini-project track where I have worked on multiple mini enhancements like GTM Implementation, PerimeterX, After Pay, SAP, Livescale, Apple Pay, OCAPI, Page Designer, Small Order Fulfillment(SOF) etc.
- Currently working on NGL Localization, which is New generation LORA (Loreal base site), where multiple brands are moving from legacy Demandware technology to new SFRA. As part localization process, we have to enable functionalities on the brand which will be enabled based on the configuration OR code customization. I have successfully implemented and pushed multiple localization brands.
