Mo.no:+918744088748 DOB:18/11/1996

3.5+ years background in diverse facets of Web development, analysis, and design of web applications using extensive programming in frontend languages like ReactJs. Excellent analytical and presentation skills with a strong background working directly with coworkers to identify business objectives and establish requirements.

EXPERIENCE

JULY 2021 – PRESENT
Sr. SOFTWARE DEVELOPER, QSS TECHNOSOFT PVT LTD

In this period of time, I worked on my client interaction and project handle skills also I learned to deliver the feedback of clients and engage them with new features.

JULY 2020 – JUNE 2021
SOFTWARE DEVELOPER, QSS TECHNOSOFT PVT LTD

In this period of time, I worked on frontend languages like Html, Css, JavaScript and ReactJS, Redux and completed many projects based on LMS and E-commerce in which I used ReactJS libraries like Material UI, bootstrap and redux. I also worked on NextJs in this period of time. I also integrated payment gateways like CCAVENUE.

AUGUST 2019 – JULY 2020
ASSOCIATE SOFTWARE DEVELOPER, QSS TECHNOSOFT PVT LTD

I started my career with ReactJS and in this period of time, I worked on ReactJS projects and learned Html, CSS, JavaScript, Bootstrap etc. I also learned Graphql with ReactJS and hands on experience on nodejs.

JULY 2018 – JULY 2019
ASSOCIATE SOFTWARE DEVELOPER, MAWAI INFOTECH PVT LTD

Here I worked on ERP based projects using technologies like Core java and Framework like Oracle ADF and also gain some experience in database query languages like PLSQI and SQL.

EDUCATION

JULY 2018
B.TECH, NIET GREATER NOIDA
Scored 72%

MAY 2014
12TH, VISHWA BHARATI PUBLIC SCHOOL
Scored 75% with PCM

MAY 2012
10TH, VISHWA BHARATI PUBLIC SCHOOL
Scored 70%

SKILLS

- ❖ ReactJS: Redux Saga, Redux, Bootstrap, Material UI, CCAVENUE Payment gateway Integration, graphql Queries Integration, Third party API's integration like google map, salesforce, Hubspot.
- ❖ Hands on experience in NodeJs, Express Js and NextJs.
- ❖ Html, JavaScript, Css, Bootstrap
- ❖ Team handling, individual complex projects handling, and client interactions.

ACTIVITIES

I like challenging problems and working on new technologies which offer great exposure to the current era of technology and development. I really like to code and full stack develop the applications.

PROJECTS

I completed almost 15-18 projects till 2022 including Complex, Ecommerce, API based.

There are following projects done in different technologies like-

SPORTSFORCE (Web Site)

ROLE: FRONTEND DEVELOPER
(10/2021 – Present)

Project Description: Sportsforce website is used for connecting school athletes to the list of colleges where their specific sports is present. There are 4 roles like ADMIN, COLLEGECOACH, ATHLETE, ADVISOR.

Technologies: Following technologies used in this project.
Frontend: ReactJS, Redux Saga, Html, Css
Backend: NodeJs, Graphql

Role: Following points will describe my role in this project

- As a Frontend developer, my role was to analyze the functionality of the project and match the design with the provided prototype and documentation

- Write optimized and reusable code according to coding standards.

BOBS

ROLE: FRONTEND
DEVELOPER (08/2021 –
10/2021)
Project Description: BOBS is an ecommerce website for ordering Building and Construction material.

Technologies: following technologies used in this project.
Frontend: Reacts, Material UI, Redux,
Backend: Nodejs, Graphql, Google API's

Role: Following points will describe my role in this project

- As a Frontend developer, my role was to analyze the functionality of the project and match the design with the provided prototype and documentation

- Write optimized and reusable code according to coding standards

IDIGIZEN

ROLE: FRONTEND
DEVELOPER (11/2020
– 04/2021)

Project Description: IDIGIZEN is LMS platform like Byju's in which user can purchase educational courses like art, cooking, swimming and tech courses. This system divided into 4 categories Admin, Faculties, Trainers and Trainee's. In which admin have all control on system and responsible for managing the IDIGIZEN. Faculties can upload their premium courses for trainees.

Technologies: Following technologies used in this project.
Frontend: Material UI, Redux, NextJs
Backend: Nodejs, Graphql, Google API's, CCAVENUE payment gateway

Role: Following points will describe my role in this project

- As a Frontend developer, my role was to analyze the functionality of the project and match the design with the provided prototype and documentation

- Write optimized and reusable code according to coding standards

OTHER PROJECT: I was involved in many projects related to ReactJS, NextJs. Some of them are listed below:

- Xseller8
- San8tize
- GPS
- Consentrade
- PMS
- Spendable
- EzeKlik
- Kyros
- Uptake Medical, ETC.
