- Good communication skills, interpersonal skills, self-motivated, quick learner, team player.

EXPERIENCE

Application Developer

📅 July 2018 – Current 📍 Hyderabad,India

- **Project 1 - (Method Workspace)** - The Method Workspace tool stores and presents approved method content in a highly structured format and uses modern user experience technology to enable IBM's project practitioners to efficiently find, tailor, share and export the content. The tool essentially enables simplified consumption of best practice methods to optimize solution design and delivery for our clients.
- **Project 2 - (Method Authoring Tool)** - Method Authoring captures information for authoring and publishing methods used on IBM projects. Along with any project information that you enter, your business email id will be saved for usage tracking and reporting purposes. Reports may be shared globally with various stakeholders within IBM such as leaders, focal points, practitioners and team members in Growth Platforms, Service Lines, Geographies, Global Quality, Solutioning and CICs.
- **Project 3 - (Tool Selector)** - This is a custom web application that provides guidance on which tools are most suitable for a project based on its characteristics and needs.

DUTIES AND RESPONSIBILITIES

- Planning and requirement Gathering of application.
- Responsible for development, testing and deployment of web application.
- Develop front end code using **Angular, Javascript, HTML, CSS, Bootstrap** and **Carbon**.
