KARTHIK T

Email: kt.oic19@gmail.com
Phone: +91-7382972618

Experience Highlights:

- Having 6+ years of experience in Oracle Integration Cloud (OIC).
- Expertise in implementing integrations with Oracle Integration Cloud for OTM, Oracle ERP Cloud etc.
- Experience in leveraging prebuilt integrations, cloud connectors and SAAS applications in the solution.
- Experience in designing end to end integration flows between various systems (On Premise and SAAS)
- Design and implement error handling using the Fault Handling Framework.
- Technically good in SQL, PL/SQL, XML, XSLT, WSDL.
- Ability to manage a team, communicate at all levels, and interact with clients.
- Communicating weekly highlight report and monthly reports to the business stakeholders.
- A highly motivated, energetic individual and a team player with excellent analytical & problem-solving skills, communication skills and interpersonal skills.

Technical Skills

Middleware	: ICS, OIC,
Cloud Connectors	: Salesforce, Oracle ERP, File FTP, REST, SOAP
Adapters	: File FTP, JMS, DB, AQ, Web Service, Oracle Applications, HTTP.
Languages	: XML, XSL, XSD, XQuery, WSDL, HTML.
Database	: Oracle 11g, 12c
Languages	: BPEL, Java.
Web /App Servers	: WebLogic 11g and 12c
Operating Systems	: Windows, UNIX, Linux.
Other	: SOAPUI, POSTMAN, WinSCP, SQL Developer.

Educational Qualifications

- Bachelor of Technology in Electronics and Communication Engineering from JNTU, Hyderabad.

Employment History

- Worked as Senior Consultant in ENSS Technologies Private Limited from August 2022 till date
- Worked as Senior Consultant in Accelalpha Software Private Limited from Nov 2020 to July 2022
- Worked as Senior Consultant in NTT Data Business Solutions Private Limited from June 2020 to October 2020
- Worked as Consultant in Xenosoft Technologies from August 2018 to June 2020.

Projects Summary:

Project Name : **STG Logistics**
Client   : **STG Logistics**
Role   : **Integration Consultant**

Description: STG Logistics have implementations between file based and Oracle ERP Cloud.
It provides complete end to end cloud solution to manage AR and AP invoices.

Responsibilities:

- Preparing Design Documents for all the Inbound and Outbound Integration.
- Gathering requirements from ERP and other teams.
- Creating SOAP, Rest, File based and Oracle ERP Cloud Connections.
- Creating integrations with required connections and integration patterns based on the requirement.
- Created the mappings and orchestrations using OIC default features.
- Implemented fault handling for all the OIC integrations.

Environment: Oracle Integration Cloud

Project Name: Pokemon Cloud Implementation
Client   : **Pokemon**
Role   : **Oracle Integration Cloud Developer**

Description: Pokemon is implementing Oracle ERP Cloud Applications to transform their business processes from legacy systems and Oracle EBS into cloud. Existing integrations are implemented in OIC, so all the interfaces are being implemented using Oracle Integration cloud.

Responsibilities:

- Preparing Design Documents for all the Inbound and Outbound Integration.
- Gathering requirements from Oracle ERP, GTM and other teams.
- Creating SOAP, Rest, File, Logistic and Oracle ERP Cloud Connections.
- Creating integrations with required connections and integration patterns based on the requirement.
- Created the mappings and orchestrations using ICS default features.
- Implemented fault handling for all the ICS integrations.

Environment: Oracle Integration Cloud

Project Name : SalMar Integration
Client   : SalMar ASA
Role   : Integration Consultant

Description: SalMar is Norwegian fish farm company and one of the world largest producers of farmed Salmon. This project mainly caters the integration requirement between various internal systems like Oracle ERP and OTM.

Responsibilities:

● Preparing Design Documents for all the Inbound and Outbound Integration.
● Gathering requirements from Oracle ERP and OTM teams.
● Configuring SOAP, Rest, Logistics and Oracle ERP Cloud adapters.
● Creating integrations with required connections and integration patterns based on the requirement.
● Created the mappings and orchestrations using ICS default features.
● Implemented fault handling for all the ICS integrations.

Environment: Oracle Integration Cloud

Project Name : CTB Inc Integration
Client   : CTB Inc
Role   : Integration Consultant

Description: CTB Inc a subsidiary of Berkshire Hathaway is global designer and manufacturer of systems for preserving grain, producing poultry and processing food. This project mainly caters the integration requirement between various internal systems like Oracle ERP and OTM.

Responsibilities:

● Preparing Design Documents for all the Inbound and Outbound Integration.
● Gathering requirements from Oracle ERP and OTM teams.
● Configuring SOAP, Rest, Logistics and Oracle ERP Cloud adapters.
● Creating integrations with required connections and integration patterns based on the requirement.
● Created the mappings and orchestrations using ICS default features.
● Implemented fault handling for all the ICS integrations.

Environment: Oracle Integration Cloud

Project Name : Future Supply Chain
Client   : Accelalpha (FSC)
Role   : Integration Consultant

Description: FSC have implementations between Oracle ERP Cloud and OTM.
It provides complete end to end cloud solution to manage Order to cash process.

Responsibilities:

● Preparing Design Documents for all the Inbound and Outbound Integration.
● Gathering requirements from ERP, OTM and other teams.
● Creating SOAP, Rest, File, Logistics and Oracle ERP Cloud Connections.
● Creating integrations with required connections and integration patterns based on the requirement.
● Created the mappings and orchestrations using ICS default features.
● Implemented fault handling for all the ICS integrations.

Environment: Oracle Integration Cloud

Project Name: Syneron Cloud Implementation
Client   : Syneron-Candela
Role   : Oracle Integration Cloud Developer

Description: Syneron-Candela is implementing Oracle ERP Cloud Applications to transform their business processes from legacy systems and Oracle EBS into cloud. Existing integrations are implemented in Magic middleware, so all the interfaces are being implemented using Oracle Integration cloud.

Responsibilities:

● Preparing Design Documents for all the Inbound and Outbound Integration.
● Gathering requirements from Oracle ERP, Salesforce, ServiceMax and other teams.
● Creating SOAP, Rest, File, Salesforce and Oracle ERP Cloud Connections.
● Creating integrations with required connections and integration patterns based on the requirement.
● Created the mappings and orchestrations using ICS default features.
● Implemented fault handling for all the ICS integrations.

Environment: Oracle Integration Cloud
