Project Details:

(1) Amtrak Case Management

Language/Tools: Configuration, Custom settings, Lightning Components, Relationships, Data Loader

Team Size: 5
Description:
Upgrading of an existing Visualforce project into Lightning project. Recording user queries and complaints, fetching data from third system and storing it in Salesforce.

Roles and Responsibilities:

- Implementing complex functionality using Apex Classes, triggers and Lightning Components.
- Involved in implementing Case Management.
- Bug fixing.
- Writing Test Classes.

(2) TRD - Ticket Generator

Language/Tools: Apex, Visual force, Customization, Configuration, Custom settings, Reports and Dashboards, Trigger

Team Size: 5

Description:

It is a ticket booking application for Concerts/ Workshops/ Events held at various locations. The price calculation is dynamic, for example: if the availability is less than 10% of total tickets price, then the price will be increased by 10% for premier concerts. Each individual can see all the future and past tickets and can provide feedback about past events.

Roles and Responsibilities:

- Involved in development of Visualforce pages and controllers.
- Data Upload using Data Loader.
- Writing Test Classes.
- Data validation through APEX and validation Rules.
