

# AJINKYA WAGHDARE

## JAVA+ANGULAR FULL STACK DEVELOPER

### EXPERIENCE

**Java + Angular Full Stack Developer** HiDubai (Tejuri COM LLC) - Dubai, Dubai  
07/2023 - Present

- Designed and implemented the back-end using Java(1.8 and 17), Spring, Spring boot, Hibernate, Spring cloud, Spring security and MongoDB, ensuring robust data storage and retrieval
- Designed and deployed highly available, scalable, and secure cloud infrastructure using AWS EC2, S3, RDS, and VPC.
- Implemented Apache Kafka for inter-microservice communication, enhancing the scalability and reliability of the system.
- Designed and developed Kafka producers and consumers for real-time data streaming between microservices.
- Developed and maintained the front-end using HTML, CSS, JavaScript, and popular Angular 15.
- Designed and implemented secure third-party API integrations, ensuring data privacy and integrity through encryption.
- Utilized encryption techniques such as AES256 for encrypting sensitive data transmitted between services.
- Conducted unit testing and integration testing for functionality.

**Software Engineer** Josh Software - Pune  
03/2021 - 06/2023

- Involved in Software Development Life Cycle (SDLC) phases such as Analysis, Designing and Software Development, Database design, and Project Architecture design
- Worked on creating microservice modules and configuring with spring discovery
- Worked on creating Rest Endpoints for the APIs Using Spring Boot
- Implemented Apache Kafka for inter-microservice communication, enhancing the scalability and reliability of the system.
- Designed and developed Kafka producers and consumers for real-time data streaming between microservices.
- Worked on the GCP Pub-Sub Module which efficiently handled the creation of Payload and its consumption
- Integrated Camunda BPM for automating complex business processes, improving efficiency and reducing manual effort.
- Worked on designing or modifying database tables as per requirement
- Involved in writing HQL, SQL Queries and Criteria APIS in the project.

### EDUCATION

**PG-DAC**  
**CDAC Pune**, 02/2021

### PROFESSIONAL SUMMARY

Adept Java + Angular Full Stack Developer with a proven track record at Tejuri Com LLC and Josh Software, excelling in robust system design and cloud infrastructure. Demonstrated expertise in Spring Boot, Kafka, and Angular, coupled with strong problem-solving abilities. Achieved significant improvements in system scalability and reliability, showcasing leadership and technical prowess.

### SKILLS

- Core Java (Collections, Multi-threading, Exception Handling, OOPS, String)
- Spring Boot (Spring JPA, Spring Batch, Spring Security)
- Hibernate
- Microservices (Spring Cloud Eureka Server, Spring Cloud API Gateway,

Resilience4j, Config Server, Config Client)

- DataBase (My SQL, PostgreSQL, MongoDB)
- Kafka, GCP-PubSub
- Junit Mockito
- Ui Technologies (Html, CSS, JavaScript)
- UI Framework (Angular)
- Awareness (Jenkins, Docker, AWS)
- Camunda Workflow Automation

**Bachelor of Engineering**  
**Pune University, 08/2018**

## PROJECTS

Business Discovery Platform - HiDubai, HiDubai is a consumer-tech initiative by Dubai Economy (DED) and incubated in Dubai SME. The business discovery platform helps revolutionizing the interaction between businesses and customers. We learned that up to 48% of businesses in Dubai lacked any digital identity and realized the need to build a smart network for people and business, in a technology ecosystem to support local businesses. There are currently over 150,000 businesses on HiDubai divided into over 200+ Categories including Manufacturing companies, Legal firms, Logistic companies, Exporters, Event organizers, Retail outlets, Tourist attractions and more. HiDubai lets you discover new places and companies. It also helps you make an informed choice based on community reviews and ratings. You can create personalized lists of companies to group your favourite places together or go through lists made by other users for inspiration. To discover, engage and share your experiences with businesses in Dubai, download HiDubai app from Google Play or AppStore., Java, Spring Boot, Angular

Loan Management System - It is part of a digital and cloud based lending platform. Built using Java, Spring Boot as a backend technology, and Angular for the front end. Its objective is to smoothen the processing of the loans for the bank. It is very efficient to handle loan-related transactions in a very accurate and convenient way. The system handles the loans journey from the disbursement to its closure. It handles the functionalities like calculation of daily interest, late interests, dues, late fees. It helps to sort out the repayments that will come in Also, some other functionalities like loan waive, write-off, refund, etc.!, Java, Spring Boot, Angular Central Configuration Portal, All operations-related configuration was intended to be included in the Central Configuration portal project. The administrator of the Portal Operation can control the dashboard by configuring each transaction. All the configuration was consumed by the other channels such as Net Banking and Mobile banking. It was following a simple maker checker workflow.

## EXTRACURRICULAR ACTIVITIES

I like to play Sports, Actively playing cricket, football, etc. I like to travel explore some new places, try new dishes.
