## WORK EXPERIENCE

### Salesforce Developer Deloitte (Integrated Disease Surveillance Application)

08/2022 - Present Bangalore

#### Responsibilities

- I have worked on Health Cloud and Service Cloud. I have quickly acquired knowledge on this healthcare asset although I joined in the middle.
- Adopted the new tool Kreator framework introduced to the project to develop 10+ screens using the tool. I was able to learn how to use the tool, its working pattern and its framework in short term and built custom screens using the tool. I did customizations and added custom logics on top of the kreator framework as per the requirement using apex coding and custom LWC.
- I was leading the development of Provider Portal, which was built using Kreator framework. During this period, I have groomed 2 team members on the Kreator tool and its functionality to help them build Provider Portal screens within targeted duration.
- I was leading the Integration of PHIRE validation engine with our IDS system to validate healthcare data. Within this period we have exposed 6 web services. I was exposed to the PHIRE Integration team, providing them solutions to smoothly connect the systems. We have used Rest API service for integration.
- I always tried to be perfect with my deliverables.
- I have proposed multiple solutions wherever possible and selected the best approach for implementation.
- I contributed to my team's success to win first bid of the asset to State of Illinois. I have received an Applause award for my work.

### Salesforce Developer Deloitte (Grants Management Application)

11/2021 - 07/2022 Bangalore

#### Responsibilities

- I have worked on Experience Cloud.
- Developed visually appealing experience site pages based on LWR templates.
- Developed customized solutions using Apex Class, Triggers, LWC JS etc. And used automation tools like Flows, Approval Process to automate the processes (sending email or updating field or calling apex action).
- I have worked on custom navigation bar, questionnaires forms and homepage of this asset using LWC. Styled the LWC screens with CSS and styling hooks to match the approved design which bagged me appreciation.
- I have maintained the code quality and maintained org's code coverage to 75%.

### Salesforce Developer TCS

04/2019 - 10/2021 Bhubaneswar

#### Responsibilities

- Involved in the design and development of Apex, Visualforce & LWC components.
- Good knowledge on functionality of the Salesforce platform.
- Developed various custom objects, custom workflows, formula fields, master-detail, lookup relationships, tabs, validation rules.
- Involved in maintaining the Apex Test classes to meet org code coverage to 75%.
- Created profiles, permission sets and implemented security and sharing rules at object, field, and record level for different users at different levels of the organization.
- Performed customization using Apex class and Apex trigger.
- Implementation of database languages like SOQL and DML to query, create, update and delete data on salesforce database.
- Experienced in working in Agile Methodologies.
