## Summary

I'm a Software Engineer with 4 years of experience in the computer software industry with strong professional skills in Python, Django and JavaScript. A good amount of experience in the startup ecosystem along with a keen eye to design and develop a product is what sets me apart. I have had the opportunity to work with Jiffy.ai, a specifically designed tool to provide enterprise platform that automates and improves the most complex business scenarios, where I developed features that improve our RPA tool to automate the different process.

## Work Experience

### JIFFY.ai, Senior Product Engineer, Jan 2021 ~ Present

- Implement microservice using flask and docker
- Integrated JWT authentication
- Build APIs using DRF and documented using Swagger

### JIFFY.ai, Product Engineer, Oct 2019 ~ Dec 2020

- Integrate hashicorp vault with our product.
- Implement the export-import mechanism in Jiffy.
- Built RestAPI component to interact with REST API calls.
- Work collaboratively with the design team to understand end-user requirements to provide technical solutions and for the implementation of new software features.
- Implementation of security and data protection.
- Coordinate with internal teams to understand user requirements and provide technical solutions.

### JIFFY.ai, Associate Product Engineer, May 2017 ~ Sep 2019

- Write effective, scalable code. Develop back-end components to improve responsiveness and overall performance.
- Django Upgrade: Django1.6 to Django 1.11.
- Optimized and reduced the DB queries in the application using Django's query optimization techniques(ORM).
- Session Management using Middleware and JQuery.
- Integrate user-facing elements into applications, test and debug programs.

# Technical skills

---

- **Languages:** Python, Javascript, HTML/CSS
- **Frameworks:** Django, JQuery, Backbone, Flask, Django Rest
- **Operating systems:** Linux, Windows
- **Databases :** Oracle, Postgress
- **Other Tools:** Git, Nginx, RabbitMQ, Gunicorn, Jira, Docker

## Education

- Anna University Bachelor's of engineering, Computer Science · (2012 - 2016)

## Certifications

- Data Structures And Algorithms In Python at NPTEL by IIT Madras
- Try Django 1.11 Python Web Development at Udemy
- Using Python to Access Web Data at Coursera

## Hobby projects

- Quiz application using Django framework.
- E-commerce application using Django framework.
