### Project :Target Recruit

Environment :SalesForce.

Role :SalesForce Technical Support Engineer.

Duration : November 2018 to Till

### Description:

TargetRecruit is a staffing and recruiting agency business suite built on a Salesforce platform that allows firms to choose from applications centered on marketing, talent sourcing, accounting, reporting and more to fill needs. It provides customizable fields, workflows and aesthetics.

TargetRecruit provides hiring and onboarding module that automates tasks to get new workers up to speed. Billing and accounting capabilities automate back-office tasks around timesheets and

payroll. Customized reporting and dashboards can help users gain information into their business. TargetRecruit provides resources to configure apps that suits user's specific requirements. Integrations include Amazon, DocuSign, ADP and Paychex. Support is offered via email and phone.

**Responsibilities:**

- Customization as per client requirements.
- creating Workflow rules, approval process, defining role hierarchy.
- Worked on Process Builder, Security Controls and Formula Fields.
- Worked on SOQL, SOSL queries.
- Worked on page layouts and change sets.
- Involved in creating users and managing the profiles, permission sets.
- Worked on creating custom Reports and Dashboards
- Data migration using Data Loader
- Migration using Eclipse IDE from Sandbox to Production.
