## Project Description:

Genesys is based on Communication and Cloud product. They have their own cloud for chat and community. Earlier their business was customized by apex and VF. We change the legacy system to CPQ and billing package. We tried to achieve most of the requirement from out of box functionality of package. Management of the project is sprint wise, tickets are distributed over sprints and then after every sprint deployment happens. We are using DocuSign, CPQ, Salesforce billing package and integration with external system to meet the business requirement.
