## EDUCATION

---

**Dr. Babasaheb Ambedkar  
Marathwada University**  
Badrinarayan Barwale College (BCA-  
SCI)  
Aug 2008 – Jul 2012

## PROFESSIONAL EXPERIENCE

---

### **Ascendion Engineering** [Collabera Technologies]

Jan 2022- March 2024

---

**Client** | Ascendion Engineering | Credit Application | June 2023 - Feb 2024

- The credit application form now includes a form validator to ensure data validity, and it displays relevant error messages when necessary.
- The "Submit" button functionality has been implemented in a way that it becomes disabled until all mandatory fields are properly filled out in the record.
- By clicking the "History" button, users can view all previously saved records.
- I have generated a unique ID on the credit application history form.
- Upon clicking the save and submit button, a snack bar has been included as part of the user interface.
- The created application form will exclusively capture today's date
- Executed Angular Lazy Loading implementation.

**Technology used:** Angular 14, Angular Material, HTML5, SASS, CSS3,Json

**Client** | AT&T | DDoS (Distributed Denial Of Service)

- The front-end user interface was developed using HTML, Angular Material, SASS, and TypeScript.
- Building components, modules, services, and handling business logic.
- Enhanced the web application's functionality by adding features like HTML to PDF and CSV conversion, form validation, and CRUD (Create, Read, Update, Delete) operations..
- Collaborated on search functionality, optimizing search algorithms and improving search performance.
- Identified and fixed bugs, ensuring a smooth and error-free user experience.
- Used Postman and Swagger for testing REST services.
- Focused on achieving 508 compliance.

**Technology used:** Angular 14, Angular Material, HTML5, SASS, Go lang, Node.js Git, Postman, Bitbucket, Jira, NGRX

### **Acloudzyn Technologies**
