SUMMARY

Skilled Salesforce Certified Developer with 3+ years of experience with extensive hands-on Conga CPQ and Salesforce Development tools such as Apex, Aura Lightning, LWC, SOQL, VisualForce Pages and Configuration Components like Flows, Process Builder etc.

EXPERIENCE

Salesforce Developer

Tata Consultancy Services

📅 2019 - Ongoing   📍 Noida

Roles & Responsibilities:

- Works as a Salesforce Developer for US-based clients.
- Worked on Conga CPQ for development and enhancements.
- Responsible for the development and maintenance of an entire business unit.
- Develop solutions for requirements (Defects, Enhancements and Maintenance) using both coding and configuration developments.
- Developed and converted manual processes into automated processes using both code and configuration.
- Developed projects from scratch which included both access based and functional requirements using Aura Lightning, LWC, Lightning Data Tables, Classes, Triggers, Flows etc.

CERTIFICATION/ TRAININGS

Salesforce Platform Developer 1

Salesforce

Completed various training related to Data Privacy, Professional Code of Ethics and Conducts.

PROJECTS

Bartending System

Bartending System is designed for a private PUB which has a login system and calculates the invoice for it (Today, Month, Annual). It's based on Aura Lightning and Apex Classes.

Automated WhatsApp Messanger Application using Python.
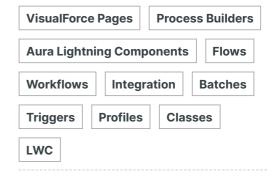

📅 2018

Developed Automated WhatsApp Messanger Application using Python which sends the typed messages to all/selected users from the database. This project was made for a Noida-based company: NewsX where I did my internship in 2018.
