

Patrick de Souza Teixeira

SUMMARY

I have more than 12 years of experience in analysis and systems development. I seek to develop my tasks in the field of Project Management, being able to practice my knowledge in planning and controlling of projects, making sure the goals are achieved within the deadline and with the determined resources. In short, to plan the execution before initiate it and, after that, to follow the execution, assessing the progress and the performance through a preset ordered system with the corrected actions being taken whenever necessary, identifying and solving conflicts and critical activities.

EXPERIENCE

Jul 2014 - Present (5 years 11 months +)
Capgemini • Systems Analyst / Developer

Project analysis and development, mapping processes in order to study and implement systems according to business rules. Performance analysis of implanted systems, as well as solving technical problems and elaborate manuals. Responsible for migration and cataloguing of credit cards files enabling instant consultations aggregating value to the State of Minas Gerais (procedure which took days depending on data flow now takes hours). Responsible for cataloguing of files such as "Convênio 115", "Sintegra", "SPED" (EFD and IOF) among others. Currently I am responsible for maintenance of apps "DAPISEF", "TEDSEF", "VAF", "VAFPR" and "NFAOFFLINE". I made the migration of all Delphi files processing to Java improving the processes of database maintenance and processing without the need to create new versions at each database change.

Dec 2009 - Jul 2014 (4 years 8 months)
Squadra • Systems Analyst / Developer

Systems analysis and development, requisites analysis. Responsible for creation of app NFAOFFLINE for the State Treasury Office of Minas Gerais enabling taxpayers to issue invoices even without internet connection. Responsible for creation of apps "DAPISEF", "TEDSEF", "VAF" and "VAFPR".

Sep 2007 - Nov 2009 (2 years 3 months)
DatasPoint Informatica • Developer

Development of support system to investors in the stockmarket.
