CAREER OBJECTIVE

To work in a dynamic and challenging environment where there is an opportunity for self- improvement in technical, individual and group-based words that will ultimately lead to the further development of my career and of the organization.

CURRENT EMPLOYMENT

- Working as “**Senior Software Engineer**” in **Apisero, an NTT Data Company** since November 2021. Having 4.1 years of total IT experience and 2 years of Salesforce experience. Having good knowledge and experience in Salesforce CPQ and Admin configurations.

PROJECT DETAILS

- Current Project is “**Metronet**” which is an Internet based company opting salesforce **CPQ** for configurations.
- Since it is a CPQ based project, having good exposure in creating Price rules, Product rules, Product(Bundles) creation, Lookup query data ,advanced approvals, flow creation, quote template, template section & content creation, basic approval process.
- Providing optimized solutions for the bigger requirements.
- Good client interaction skills. Directly connected with client and gathered requirements and provided efficient solutions.
- Good experience on admin configurations like permission level, reports and dashboards
- Good understanding in Quote, Contract, Subscription related topics.
- Worked on Product rules for the rule alert whenever product is configured , validation rules to validate the product combinations, selection rules to automate the customized configurations.
- Worked on Flow automation to automate record updates, creation , to send an email alert and automate the approval submission. Good knowledge in report and dashboard creation.
- Worked on creating a new approval process based on Quote’s list price change and discount values provided and submitted it to respective users and automate the approval based on email response.
- Worked on Price rules to change the list prices based on subscription terms and created

a lookup query data record to store the prices with subscription terms.

- Worked in a Data loader tool for deployment related to records and changesets for flow, custom object, custom flow etc.
- Good experience in debugging the issues. As a Salesforce consultant role in a client company, have to develop new requirements and enhance existing features and resolve support requests and production issues on a daily basis.
- Hands-on experience in Apex Triggers.

PREVIOUS EMPLOYMENT

- Previously worked in Legato Health Technologies as “**Associate Benefit Analyst**”, from February 2021 to November 2021, performed manual testing and had good exposure in JIRA and mainframe. Formerly worked in Cognizant Technology Solutions from August 2019 to January 2021.

CERTIFICATIONS

- Certified Salesforce Administrator
- Certified Platform Developer
- Salesforce CPQ Specialist
- Corporate training on SQL (certified), developing test cases.
