- Salesforce Certified Sharing and Visibility Designer
- Salesforce Certified Sales Cloud Consultant
- Salesforce Certified CPQ Specialist
- Salesforce Certified Platform Developer II
- Salesforce Certified Platform Developer I
- Salesforce Certified Platform App Builder
- Salesforce Certified Administrator

Work Experience

Dexcom Inc. – Technical/ Dev Lead

Team Size: 8

As a healthcare industry, customers were following different sales processes for each country to sell healthcare products. They are using Salesforce as a CRM platform to streamline their process.

As Team Lead, my responsibilities were to: -

- Analyze the client requirements, develop a feasible solution, development, testing and weekly sprint-wise deployment of the enhancements.
- As a Developer/ Lead Developer, I was involved in discussions with other teams and taking up new requirements on top of existing.
- Build feasible automated business processes by making use of out-of-the-box (OOB) features in Salesforce.
- Responsible to interact with developers, testers and product owners ensuring smooth roll-out of production deployments.

Philips Quote-to-Cash (Apttus CPQ) – Technical/ Dev Lead

Team Size: 8

As a healthcare industry, customers were following the Quote-to-Cash life cycle for thousands of products. Configuration of Quote, Pricing, Discounting, Promotions, Order management used to happen in Apttus CPQ. As team lead, my responsibilities were to analyze the client requirements, develop a feasible solution, development, testing and weekly sprint-wise deployment of the enhancements.

NEC Display Solutions – Sr. Salesforce Developer

As the company is evolving, they want to switch focus from Classic to Lightning mode. So as a Salesforce developer, I was involved in migration of NEC Salesforce org from Classic mode to Lightning. The project includes customizations in the Lightning page builder and developing custom Lightning components as per client's requirement.

I was responsible for analyzing the client requirements, developing a feasible solution, development, testing and weekly sprint-wise deployment of completed enhancements.

Wealth Enhancement Group (WEG) – Sr. Salesforce Developer

The project was to create the customer portal for WEG customers. I was involved in development of customer portal using Salesforce Community. Focus of the project was mainly on exposing customer Account data in a way that it should be visible to specific Salesforce user and to customer only. Features include viewing the Accounts and their current status, send/receive secure messages to Account Advisor, and Document sharing.

KwikTag – Sr. Salesforce Developer

Company was in need of basic CPQ configurations along with CPQ Quote templates with rich look and feel. Clients needed Quote Templates separate for Customer and Retailers. And, some basic configuration in CPQ package like, bundling the products and applying pricing rule on same.

As a Salesforce developer, I was involved in designing custom Quote templates using VisualForce pages using XSL-FO coding. Also, involved in requirement gathering, finding feasible solutions, development, unit testing and deployment.

H&R Block – Team Leader + Sr. Salesforce Developer

Team Size: 2 + Fellow Developers

Project involves designing forms using FormAssembly tool and integration those forms into Salesforce System. These forms were used by customers for filling out detailed personal information. Along with this we also provided robust solution for existing complex process builders.

As a developer, I was involved in creating new forms in FormAssembly, salesforce development, testing and deployment for enhancements to production.

RL Solutions – Team Leader + Sr. Salesforce Developer

Team Size: 2

Developed Quote Templates on Salesforce CPQ platform. Quote Templates were enriched in design and user look and feel. CPQ allows to do customizations using XSL-FO and hence leaned the in detail customizations and built the Quote templates for customers.

As a Salesforce developer, I was involved in designing custom Quote templates using VisualForce pages using XSL-FO coding. Also, involved in requirement gathering, development, unit testing and deployment.

General Electric (Inter Org Lead Sharing) – Salesforce Developer

Team Size: 5

This project mainly involves cross business project management through a common centralized org which includes creating projects and inviting users from different businesses to join as project team members.

For connecting different business orgs, lightning connector is used which makes data transfer lightning quick. It has many benefits over heavy web service calls like quick and real time response and minimal data processing overhead. It has been built with rich user interface using lightning design system libraries which works in Salesforce classic, Salesforce lightning experience and mobile devices (Salesforce1).

As a salesforce developer, I was involved in customizations in Lightning connector and connections between Internal Salesforce objects and External Salesforce objects. Development of front end logic for sharing lead with user of other org.

BajajFinserv Lending - Module Lead + Sr. Salesforce Developer

Team size 6 + Fellow Developers

The project is about development and maintenance of features of finance business. The project scope was distributed among various activities that start from loan application initiation and end with their approvals and maintenance.

Development of end-to-end online application of Business Loans, Personal Loans. Includes Third party integrations like CIBIL, PAN Verification, Email Service, social media integrations. Small Enhancements related to Offline flow of Loan Applications.

As a lead developer, I developed backend and front end for many complex flows involved in this application. Also, also responsible for developing code to fit in existing framework and develop on top of it.

Salesforce.com Implementation - Salesforce Administrator, Developer, Consultant, Technical lead

Other multiple projects for different clients in Salesforce.com platform, Lightning, Data migrations, Desk.com migration to Salesforce, Dell Boomi integration, etc.

Academic Qualifications

- Bachelor of Engineering (B.E.), in Information Technology from Smt. Kashibai Navale College of Engineering, Affiliated to Pune University, first class with distinction.
- 10th and 10+2 from Maharashtra Board, with first class.
