SUMMARY

Results-driven software engineer with 6 years of experience specializing in .NET development, Web API integration, Angular framework, and database management including MYSQL and SQL Server. Proven track record of delivering high-quality software solutions, adept at collaborating with cross-functional teams to meet project deadlines and exceed client expectations. Strong problem-solving skills and a passion for staying updated with the latest technologies

EDUCATION

BE (Information Technology)

Sal college of engineering, GTU

📅 06/2014 - 03/2018

EXPERIENCE

Software Developer

Excelsior Technologies

📅 05/2018 - 10/2019 📍 Ahmedabad

Specializing in software development and digital solutions.

- In my first job, I learned to use .NET, Web API and SQl SERVER effectively. I worked on projects involving software development and database management, which helped me improve my skills. I actively contributed to the design and implementation of .NET and WebAPIs, collaborating with senior developers to ensure adherence to industry best practices and standards.

Senior Software Engineer

Shaligram Infotech

📅 11/2019 - 09/2023 📍 Ahmedabad

A dynamic service-based company specializing in mobile development, web development, and Python development

- I took on a significant role by initiating and developing a project from the ground up. Working alongside another developer, we communicated closely with our UK-based client to understand their needs and ensure our project aligned with their goals Additionally, I expanded my skills by learning Angular, enhancing my proficiency in front-end development. This experience demonstrated my ability to lead projects and adapt to new technologies, contributing to my growth as a software engineer

Software Engineer

Contrado

📅 09/2023 - Present 📍 Ahmedabad

Contrado: A London-based e-commerce printing company established in 2002. Renowned for its high-quality custom products, Contrado serves both B2B and B2C clients globally.Specializing in printed fabrics, garments, and homeware.

- At Contrado, an e-commerce company specializing in custom products, I delved into the intricacies of online retail. My key achievement involved developing a t-shirt website serving both US and UK markets. Furthermore, I implemented multilingual pages for 14 countries, ensuring a tailored experience for diverse customers. These endeavors not only deepened my understanding of e-commerce platforms but also broadened the company's global presence and customer satisfaction

PROJECTS

Car Wash App

📅 06/2018 - 12/2018

Users can Book their car wash services,Provided some features like Offers, Cash On Delivery,Nearby Car Garages Feature etc,Users Can Also Track the Service Status.

Tools and technologies: ASP.NET MVC For Admin Panel, Web APIs, JavaScript, JQuery, Entity Framework, MYSQL

Tutor App

📅 12/2018 - 11/2019

We have developed an Education Training Web Site Called TutorAPP. With this App Students can learn new courses from anywhere and anytime. Tutors can also earn from students. We have developed admin panel to manage student to tutor Payments. Manage online Courses, video chat features etc.

Tools and technologies: ASP.NET MVC For Admin Panel,Web APIs, JavaScript, JQuery,Microsoft SQL Server

Staff Assist

📅 11/2019 - 09/2023

The platform provides drivers to clients for specific locations. Clients can request a driver, and the company's employees assign a particular driver for the job. Drivers can log in to the app and see which location they should go to. I have worked on developing the admin panel from scratch, as well as the client portal. I also developed the APIs for both the iOS and Android mobile app development . I communicated with a UK-based client on a daily basis and was responsible for both front-end and back-end development. Additionally, I managed a team of 4 to 5 developers

Tools and technologies: Angular 11, .Net core , Web APIs , Reactive Forms, Microsoft SQL Server

Contrado : Product

📅 09/2023 - Present

Contrado: A London-based e-commerce printing company .Specializing in printed fabrics, garments, and homeware. I was responsible for developing pages displayed on external websites, handling all backend development, CMS integration, and utility services. Additionally, I worked on the design page where users could customize the products they wanted to purchase. I completed backend development to create new custom T-shirt websites for both the UK and US. The websites are now available for users to use

Tools and technologies: C#, Angular 13, .Net core , Web APIs , Reactive Forms, Microsoft SQL Server
