Internship Projects

- **Project 1 – Travels Ticket Booking App**

  Project Overview:

  With Travels ticket booking app passengers can book their tickets. Passengers needs to register on the app after selecting journey date, source city, destination city and other booking related information after this passenger need to choose which payment method, they are using Online or Offline after that he/she received email containing all travel ticket booking information. All tickets booking request approved from travel agency based on their payment method.

  Responsibilities:
  - o Created custom objects, fields as per requirements.
  - o Applied validation rules to ensure that the data a user enters in a record meets our requirements.
  - o Created Email Templates and Workflow rule for sending welcome, booking details emails to passengers.
  - o Created Process builder process for creating record on another custom object.
  - o Created Approval process.
  - o Created Roles, Profiles, Defined Permission Sets.
  - o Created Flow for sending birthday wish email to passengers.
  - o Created Trigger, Batch Apex.
  - o Implemented schedule apex class.
  - o Designed Lightning Web Components for displaying Active Travels, Records.
  - o Created Reports and Dashboard.
  - o Import & Export of the data through Data Loader.

- **Project 2 – Log Book App using LWC and Heroku Cloud Platform**

  Project Overview:

  With the help of Log Book App, we have automated manual record keeping process while Covid-19 which keeps the record of visitors who visited digitally. Visitor needs to scan the QR code via mobile phone after scanning they will be redirected to webpage containing form after the form filled visitor received email regarding their visit and all record will automatically save into object and google sheet.

  Responsibilities:
  - Created custom objects, fields as per requirements.
  - Created Email Template for Sending visit email.
  - Created Workflow rule and email alert for sending visit information email.
  - For synching the records with google sheet i used Coefficient Extension that automates moving data from Salesforce to Sheets.

- **Project 3 – News App using Lighting Web Components**

  Project Overview:
  - In News App, I fetched news articles from http://newsapi.org/ and display's that news articles using Lighting Web Component.

  Responsibilities:
  - Project setup, App creation.
  - Lightning page creation.
  - Configured Remote Site Setting.
  - Generated API key from http://newsapi.org/
  - Created Apex Class, and Designed Lightning Web Components for displaying news as cards.
