

# SHRIKANT RAUT

Senior Salesforce Developer

- shrikantr976@gmail.com
- +91 9762977920
- shri-raut
- Mumbai, Maharashtra, India
- Deloitte USI

Over 4+ years of professional IT experience, all of it on Salesforce CRM platform as a developer. Experience in development and administration of Salesforce.com CRM using Lightning Web Components, Apex Classes, Triggers, Lightning Components, Applications, Security Model, Visualforce, etc. Good knowledge and hands on experience in Salesforce Lightning.

Flexible, organized and dedicated professional, eager to take on challenging tasks that utilize my knowledge and skills to the fullest.

## CERTIFICATIONS

- Platform Developer I
- Platform Developer II

## SKILLS

### SFDC

- Apex
- Triggers
- Process Builder
- SSO (Basic)
- Lightning
- Web Services
- Work flows
- Visualforce
- LWC
- Batch Classes
- ANT
- Data Migration
- Workbench
- Conga Composer (Basic)

### Others

- HTML
- JavaScript
- CSS
- Core Java

## WORK EXPERIENCE

- Present **Self Service Portal (SSP) | Org : Deloitte USI**  
**Role – Senior Salesforce Developer**  
**Technologies – LWC, Salesforce Lightning, Triggers, Batch Classes, Community, Translations, Org-Platform Cache, Azure DevOps (VSTS), GIT, ESLint**  
 - The SSP transformation initiative is built on SF leveraging custom community, LWC, Lightning, 20+ integrations. It is an effort to improve engagement with individuals and provide a mobile first multi lingual solution to enable better access and interaction with the facilities provided by the state government. This translates to improving the manual self-service functionality, modernizing user experience, and increasing adoption.  
 - Worked extensively on lightning web components, apex classes, apex triggers, batch classes, web services, etc leveraging SF platform cache, translations.  
 - Handled a team of 6 people, to co-ordinate in developing required solution.  
 - Was involved in developing various utilities/internal frameworks that helped in speeding up the actual project development.
- Oct 2019 **Communication Publication & Audience Enablement Portal | Org : Deloitte USI**  
**Role – Senior Salesforce Developer**  
**Technologies – LWC, Salesforce Lightning, Triggers, Batch Classes, Email Alerts, Community, Data Loader, VSCode, Azure DevOps (VSTS), GIT**  
 - Successfully implemented a salesforce based platform for real time communication publication and a portal for targeted audience to access and react on the published communications to increase awareness about particular areas. The system is flexible enough to target audience based on granular criterias, providing the flexibility to choose one of many readily available templates created using LWC.  
 - Developed Lightning Web Components, Aura Components, Apex Classes, Apex Triggers, Batches and Schedulers.  
 - Actively involved with BA's, Tech Leads, Architects in finalizing the design and implementation approach.  
 - Was a part of team implementing algorithms for communication scoring and decay logic that helped components to decide on communication visibility and reporting the analytics for individual communication.

Apr 2019

## **Two Wheeler Loan Origination System | Org : Persistent Systems**

### **Role – Senior Salesforce Developer**

#### **Technologies – Salesforce Lightning, Web Services, Batch Classes, Triggers, Process Builders, Approval Processes, Community Cloud, ANT, SVN, Conga Composer (POC)**

- Successfully analyzed requirements & developed different POC's to achieve desired result in the discovery phase.
- Actively involved with Business analysts, Dev Leads in designing data/security model.
- Developed Apex Classes, Lightning Components, Apex Triggers, Batches and Schedulers.
- Configured workflow rules, process builders, email alerts.
- Performed customizations using Apex code and Lightning framework.
- Integrated Salesforce with multiple third party systems like Finnone, Digio, etc.
- Successfully analyzed & migrated master data.
- Provided real time on site production support after go live.
- Trained client side SF admins to make configurational changes, migrate master data, etc.
- Successfully handling business users on call and on site.

June 2018

May 2018

## **Used Car Loan (UCL) Origination System | Org : Persistent Systems**

### **Role – Salesforce Developer**

#### **Technologies – Salesforce Lightning, Web Services, Batch Classes, Triggers, Visualforce, Process Builders, Community Cloud, ANT, SVN, etc**

- Successfully implemented a salesforce lightning based application used for origination of used car loan applications, with minimal data entry by reducing manual intervention and automating Credit Deviations, Risk Rules, car valuation & telephonic/on site/office verification task assignment to respective agencies on basis of location, discrepancy assignment & resolution among sales/credit/operations users.
- Developed Apex Classes, Lightning Components, Apex Triggers, Batches and Schedulers.
- Implemented custom task assignment, routing & sharing mechanism.
- Was involved in setting up a community portal for valuation & verification agencies, implementing financial calculations, user friendly dashboard, application initiation via different mediums such as Aadhar/OCR/Manual, etc which ended upon disbursement of the loan application to Finnone.
- Integrated Salesforce application with multiple third party systems like Finnone, Middle Ware, Multi Bureau, EKYC, etc.
- Successfully analyzed and migrated master data.
- Provided real time production support for 2 weeks.
- Trained client side SF admins to make configurational changes, migrate master data, etc.
- Developed batch classes, small functionalities as a part of enhancement.

June 2017

May 2017

## **Optum OC Porting | NIE & Enhancement | Org : Persistent Systems**

### **Role – Salesforce Developer**

#### **Technologies – Triggers, Permission Sets, Public Groups, Communities, ANT, SVN, Visualforce, SSO**

- Successfully deployed required functionalities from existing SF production org to a new SF production org, with necessary configurations & data migration.
- Developed/made changes in existing Apex Classes, VF pages, Triggers, etc.
- Created new communities & made required configurations to setup single sign on (SSO).
- Implemented various features like bulk task export & import, enhancement in existing community implementation, etc.
