KEY PROJECTS & ACHIEVEMENTS

MIS:-(Management Information System)

From Scratch we have developed the MIS project to replace our old CRM product and with new modules, Ticketing system based on both Internal and External process, New Pipeline for Leads, Detail pages for Accounts, contacts, projects, tickets and invoices and i have worked simple tasks in Angular7 in MIS project for 2 months.

Technology Stack: PHP (Laravel, Angular 7, MySQL, JavaScript, jQuery, Ajax).

CRM:-(api.ndot.in).

It's already developed Kohana project, For one year I have been working in the CRM based on the client requirement (SEO, HR, Business Development) Team.

NDOT's own CRM application with product development/improvement, development of specific requirements & maintenance services. Developed features such as contact management, account management, customer segmentation, email integration, lead storage, reports and custom filter and Third Party Integrations (Hubspot, Activecampaign).

Technology Stack: PHP (Kohana, MySQL, JavaScript, jQuery, Ajax).

IDPAL:-(www.id-pal.com)

It's already developed Laravel project I have done some changes based on the client requirement and in API.

Technology Stack: PHP (Laravel, MySQL, JavaScript, jQuery, Ajax).

TNGCTA:- (reigntouch.com/tngcta)

I have done the whole backend process and database design and API. This is an Tamil Nadu Government College of Teachers Association management System, to manage whole tamilnadu government arts college professors based upon the zone and colleges and manage the accounts of all professors and the Association bearer members, this project shows the clear hierarchy. State then Zone and then Unit (college), User Management, Attendance Management, Account Management has been done.

Technology Stack: PHP (Codeigniter, MySQL, JavaScript, jQuery, Ajax).

ESCHOLAR:-(escholar.co.in)

This is an school Management System, it contains features like to make more interaction with parents, teachers and students, Teachers can assign homework and make an announcement regarding to subject or public announcement for both parents and students, and also manage the entire transport system in the school by getting the current location of every vehicle (Google Map Integration), I have donesignificant role inthis project and done full API.

Technology Stack: PHP (Codeigniter, MySQL, JavaScript, jQuery, Ajax).
