Full Stack Developer with experience in front-end and back-end development, targeting challenging positions in Web Development

## CORE COMPETENCIES

Project Management

Software Development Lifecycle

Test Execution & Planning

Full-Stack Development

Test-Driven Development

Web Application Development

Module Development

PHP Development

Database Integration

Python Libraries/Frameworks

## SOFT SKILLS

Collaborative

Critical Thinker

Team Player

Analytical

## WORK EXPERIENCE

### Jul'22-Present, Boston Harbor Consulting Pvt. Ltd., Chennai as Senior Associate Developer

#### Responsibilities:

- Leading a team of 5 junior associate developers in the development of a SAP CPQ, ensuring seamless administration tasks and project execution
- Responsible for the design, development, configuration and unit testing of Clients Configure-Price-Quote (CPQ)
- Managed system using Python and IronPython
- Skilled with technologies Callidus CPQ along with Salesforce

### Jan'22-Jul'22, Rule1 Ventures Pvt. Ltd., Chennai as Senior PHP Full Stack Developer

#### Responsibilities:

- Developed front-end and back-end web applications using PHP, MySQL, JavaScript, and other technologies, ensured seamless integration and functionality
- Collaborating with cross-functional teams to deliver high-quality web applications using various technologies such as CodeIgniter, CSS, Bootstrap, PHP, MySQL, JavaScript, and React JS
- Created back-end modules to streamline administration tasks, improved efficiency and productivity
- Developed APIs (Application Programming Interfaces) to enable communication between different software systems or to provide data and functionality to external applications
- Worked on the server-side of web applications, managing tasks such as data processing, database management, and server-side scripting

## PROFILE SUMMARY

- Offering nearly 6 years of experience in full stack development, specializing in front-end and back-end technologies across various industries
- Currently working as a **Senior Associate Developer with Boston Harbor Consulting Pvt. Ltd.**, leading a team of five junior associate developers in developing a Python-based application
- Skilled in **Project Management, Software Development Lifecycle, Front-end and Back-end Development, and Troubleshooting Full-stack software code** using languages and tools such as HTML, CSS, JavaScript, React JS, Node JS, AWS Textract, Ajax, Linux, PHP, Laravel, Python, and AWS S3
- Successfully implemented projects using Waterfall and Agile methodologies, showcasing adaptability and versatility in project execution
- Showcased strong leadership and communication skills by coordinating with cross-functional teams to find creative solutions and deliver high-quality results
- Identified and optimized performance bottlenecks in Python applications, profiled code, improved algorithms, and optimized database queries
- Conducted thorough code reviews, ensured adherence to coding standards, best practices, and identified areas for improvement; implemented quality assurance processes and standards

## EDUCATION

2017

**B.Tech. (Electronics & Communications Engineering)** from Karunya Institute of Technology and Sciences, Coimbatore

#### Responsibilities:

- Developed and implemented the Admin Panel using PHP and MySQL, streamlined administrative processes and improving overall efficiency
- Supported full-stack development tasks, including coding, testing, implementation, and maintenance support, ensured high-quality software solutions
- Created jQuery, JavaScript, and Ajax modules to facilitate project establishment and administrative processes, enhanced project execution and management

#### Achievements:

- Successfully implemented projects using Waterfall and Agile methodologies, showcased adaptability and versatility in project execution
- Utilized AWS Textract for data extraction from insurance forms and AWS S3 for file uploading and downloading, improving data accessibility and storage
- Developed Node.js scripts to capture and process data from WebSockets, enhanced data accessibility and enabled logic and calculations
- Established modules for survey creation and data analysis, provided valuable insights for decision-making and strategy development
