Current Engagement

Silicon Valley Bank (SVB)

Role: Azure Architect

Location: Houston, USA / Lucknow, India

Team Size: 21

Job Profile/Responsibilities:

Architected, designed, and managed solutions in Azure for Silicon Valley Bank and part of SVB's Azure IaaS Architecture team. Responsible for application maintenance and platform support for M365 and Azure.

Solutioning includes extraction of Application Insights and Log Analytics workspace data of existing App Services Web Apps and Web APIs, transformation, and loading using Azure Data Explorer. Data analysis was performed using Kusto Query Language (KQL) and presented as dashboards using Power BI.

Also, automated the process of VM creation in Azure for remote users based on the Service-now request using Azure Automation.

Previous Engagement

American International Group (AIG)

Role: Program Manager/Azure Architect

Location: Houston, USA

Team Size: 35

Job Profile/Responsibilities:

Managed the Platform and Application Development Support (AMS) as a Program Manager for the Microsoft Shared Services Unit. This also included new application development for different business processes, defining support best practices, defining and providing daily, weekly and monthly reports and metrics defined as a part of the SLA, and working on continuous improvement initiatives. Also involved in new business development and proposals.

Also provided assistance to the SSU management in their endeavors for ready to market cloud products and services development by architecting solutions and infrastructure in Azure.

The Microsoft Shared Services Unit within AIG provides technological expertise to the AIG business in developing and maintaining line of business applications built on Microsoft platform using Microsoft Azure services, M365, and other third-party tools.
