Company Name: eTranbiz global Technology Solution Pvt Ltd

Client: SBM

Applications: Oracle Application HRMS

Other Tools: SQL Developer, TOAD, WINSCP.

Duration: Aug 2018 to Oct 2020

Roles & Responsibilities:

This project is Oracle Application HRMS support project, which deals with the existing system support and new initiatives and activities carried out for various business applications. As a part of this assignment, I worked on HRMS Modules like Core HR, Absence Management and OTL.

- Handled end-to-end support of HRMS Application.
- Taking care of HRMS application for all modules like Core HR, Absence Management, Payroll and OTL.
- Providing Pre support for SBM Banking Customer
- Creation of New Absence types
- Modification of fast formula as per the requirement.
- Resolving the issues as per tickets in OVS.
- Expertise in OTL application setups and Webadi.
- Expertise in System Administrator responsibility to create users, responsibilities, Values Sets and Request sets.
- Proficient in handling Oracle SR's.

Project 2 #

Company Name: Capgemini

Client: Internal project

Applications: Oracle Fusion HCM Implementation

Duration: Oct 2020 to till

Roles & Responsibilities:

- Configuring setup related to Core HR, Absence Management and OTL modules using Functional Setup Manager in Fusion Application.
- Configured the Absence Management module to enable the Vacation and Sick plans.
- Defined absence types, reasons and absence plans as per the requirement.
- Involved in Enterprise configuration setup.
- Experience in reference data objects like jobs, grades, Locations and departments.
- Coordinated with offshore and onsite team members.
- Communication and Co-ordination with the client, on-site team members and the project lead providing updates and findings.

Project 3 #

Company Name: Capgemini

Client: Internal project

Applications: Oracle Fusion HCM Implementation and Support

Duration: Jun 2022 to till

Roles & Responsibilities:

- Involved in full life cycle implementation of oracle OTL module.
- I worked on OTL implementation project for Guatemala and Spain regions. I got experience to work closely with clients, as part of this I went to on-site for a knowledge transfer post Go-live.
- Delivered workshop to Business users on the OTL functionality.
- Work closely with Business Users to scope and draft business and functional requirements and then write the user stories.

- Proficient in AGILE Project approach.
- Analysis of Conceptual design document and understanding Business Requirements & Functional design documents for the migration/interface components.
- Prepared BR30, BR100, MD50, SOP, and test script documents as per the client requirements.
- Successfully executed UAT and provided production support for the end users after go-live.

I hereby declare that all the information furnished above is true and accurate to the best of my knowledge.
