As a passionate Senior Automation Engineer with over 4 years of industry experience, I am seeking a challenging role where I can utilize my expertise in test automation, software testing, and project management to contribute to the success of a forward-thinking company. With a proven track record of enhancing test frameworks, improving process efficiencies, and leading cross-functional teams, my goal is to align my technical skills and strategic insights with the organization's mission to deliver innovative solutions and drive continuous improvement in software quality.

Professional Summary

- Over 4 years of software testing experience with a focus on test automation and BDD frameworks.
- Expertise in Selenium WebDriver, Cucumber, and Java for creating and executing automated test cases.
- Proficient in version control using Git and GitHub, with experience in CI/CD using Jenkins.
- Strong understanding of OOP principles, Agile and Scrum methodologies, and the STLC process.
- Skilled in Functional Testing, Sanity Testing, Regression Testing, and exploring API testing with Rest Assured.
- Demonstrated ability to lead projects, communicate effectively with stakeholders, and deliver quality results in fast-paced environments.

Career Timeline

Dec 2022 - Jun 2023
Senior Engineer Quality Engineering
Iris Software

Oct 2022 - Nov 2022
Senior QA Engineer
GenX Info Technologies Pvt. Ltd

Jul 2019 - Aug 2022
Specialist
Allianz Technology

Jun 2014 - Jul 2018
Training & Placement Officer (TPO)
Bhagwant Charitable & Research Trust

Work Experience

Dec 2022 - Jun 2023

Senior Engineer Quality Engineering
Iris Software

Workdone:
- Executed regression testing to ensure software stability after modifications
- Collaborated with Scrum Master, Developers, and Test Lead to streamline project communication
- Adhered to agile development methodologies throughout the software development lifecycle
- Documented defects to maintain quality standards and facilitate resolution
- Automated manual test cases to enhance testing efficiency
- Implemented TestNG testing framework for structuring test cases

Achievements
- Increased regression testing throughput by automating test suites
- Played a key role in maintaining zero high-priority defects post-release

Oct 2022 - Nov 2022

Soft Skills

Team Leadership · Time Management · Problem-Solving · Communication · Adaptability

Technical Skills

- Jira
- Unix
- TestNG
- MySQL
- Java Programming
- Selenium WebDriver
- Jenkins
- Cucumber
- Git & GitHub
- Maven

Core Competencies

- Software Quality Assurance
- Version Control
- Agile Methodology
- Test Automation
- Project Management

Education

- M.E
  Solapur University

Languages

English · Marathi · Hindi

Hobbies

Coding Challenges · Tech Blogging · Strategy Gaming · Robotics

Achievements

- Led the automation transition for the Onemarketing project, resulting in a 40% reduction in regression testing time.

Senior QA Engineer

GenX Info Technologies Pvt. Ltd

Workdone:

- On Bench

Achievements

- NA

- Successfully automated 70+ test cases for RBC, improving test coverage by 25%.

Jul 2019 - Aug 2022

Specialist

Allianz Technology

Workdone:

- Developed feature files for new components within the BDD framework
- Utilized Git for various version control activities and Jenkins for regression testing
- Authored manual test cases and assessed their automation potential
- Compiled daily Jenkins reports to track progress within the scrum team
- Performed branch testing to ensure code quality before merging
- Used Adobe Experience Manager for creating functional web pages
- Executed Selenium automation scripts using Java
- Automated testing for defects and new features prior to production deployment

Achievements

- Implemented a streamlined process for web page creation, reducing turnaround time by 20%
- Enhanced automation coverage, leading to a 15% decrease in critical bugs

Jun 2014 - Jul 2018

Training & Placement Officer (TPO)

Bhagwant Charitable & Research Trust

Workdone:

- Organized and managed campus interviews for student job placements
- Developed and delivered career counseling sessions to aid student career development
- Prepared students for interviews and group discussions through placement training
- Created promotional materials to attract potential employers
- Guided students in making informed career decisions
- Implemented job search strategies to increase placement rates
- Identified and fulfilled training requirements to enhance student employability
- Facilitated connections between students, alumni, and employers
- Coordinated a comprehensive placement campaign

Achievements

- Increased campus placement rate by 35% within the first year of tenure
- Established new partnerships with industry-leading companies, broadening job opportunities

Projects

RBC Canada

- Reviewed test cases and pull requests for automation code.
- Automated manual test cases for efficient regression testing.
- Participated actively in Agile development processes.
- Executed test suites using TestNG framework.
- Created defects for test failures and communicated with the team for resolutions.

oneMarketing

- Utilized Git for version control activities and Jenkins for regression testing.
- Analyzed defects for automation feasibility and performed manual test case writing.
- Managed Adobe Experience Manager for new functionality pages.
- Automated defects and new features for production deployment.
- Performed quality assurance through branch testing.
