

PROFESSIONAL SUMMARY:

- As a software professional, I possess 6.3 years of experience, in testing Web/Mobile/Salesforce applications and also have experience in developing, implementing, testing Guidewire application.
- Experience working in Pair programming and has the ability to interact with product owners and all the business stakeholders to continuously refine and determine test automation requirements.
- Expertise in creating and delivering Test Automation Frameworks, which include Functional Driven, Data Driven, Hybrid, Keyword Driven and experience in designing Page Object Model (POM) design pattern along with Page Factory concept using Selenium WebDriver API and Java, Python.
- Deep understanding of different test automation approaches like Test Driven Development (TDD) using JUnit/TestNG for extensive code coverage, Behavior Driven Development (BDD), and designing framework using Cucumber.
- Good understanding with Web Services and knowledge on SOAP protocol and REST architecture and experience in API Testing using Postman, SoapUI, Rest Assured and fluent in handling XML, JSON format.
- Thorough Knowledge of Core Java Programming and good object-oriented design and coding skills.
- Gained good experience working in Agile and DevOps Environment and its tools, which includes GIT along with GitHub, Bitbucket for its repositories and for designing & executing CI/CD process using Jenkins to continuous build and deploy to Dev/QA/UAT environments, and for scheduling and executing Build and Release Activities using Maven.
- Gained knowledge of Guidewire Integration (Batch process, Messaging, and Webservices), and Guidewire configuration (PCF/Data configuration, Entities and extensions, implementing validation rules, Enhancement, Underwriting rules, activities and forms configuration, document generation).
- Thorough understanding and experience in all phases of STLC, SDLC and Bug Life Cycle.
- Extensively involved in Functional, Smoke, Sanity, Retesting, Regression, System, Integration, Exploratory, E2E, UAT, Usability, Compatibility, and cross-browser testing.
- Well-versed in designing test scenarios and test cases from use cases and system design documents respectively for software functionality, usability, regression testing.
- Ability to interact with the development team members in fixing defects by analyzing and tracking it and generating test closure reports after successful completion of the test execution phase.
- Expertise in Test Management and Bug reporting tools like HP-ALM/Quality Center, Jira for testing and maintaining a central repository of testing artifacts.
- Hands-on experience in database testing for databases like Oracle, SQL Server.
- Experience in sharing technical expertise and providing technical mentorship within the team.
- Excellent verbal and written communication skills with strong analytical, problem-solving ability.

WORK EXPERIENCE:

- Working as Consultant at OpenTeQ Consultants Private Limited from January'20 to Till Date.
- Worked as Automation Test Engineer at Ta3s Solutions Private Limited from May'19 to November'19.
- Worked as Quality Analyst at Avis Engineering & Quality Solutions Pvt Ltd since August'17 to July'18.
- Worked as Test Analyst at Interop Software from November'15 to December'16.
- Worked as Test Analyst at Oxygen 8 Ltd from June'14 to October'15.
- Worked as Test Analyst at Suryah Limited from November'12 to May'14.

ACADEMIC CREDENTIALS:

- MSc in Microelectronic and Communication Engineering, University of Northumbria, Newcastle, UK.
- Bachelor of Technology in Electrical and Electronics Engineering, JNTU, Hyderabad, India.

TECHNICAL SKILLS:

Automation & Testing Frameworks	: Selenium WD/Grid, Cucumber, JUnit, TestNG, Page Object Model & Page Factory, Data Driven Framework, SoapUI, Postman, REST-Assured.
Business Domains	: Utility, E-commerce, Insurance, Finance, Banking, Mobile, IoT.
Products	: Guidewire PolicyCenter, BillingCenter, ClaimCenter
Programming Languages & Tools	: Java, Python, Gosu, IntelliJ IDEA, Eclipse, Guidewire Studio, PyCharm.
Web Technologies	: HTML, CSS, JavaScript, JQuery, XML, JSON
Source Code Management	: Git, Bitbucket.
PM & Bug Tracking	: HP-ALM/QC, JIRA, Bugzilla.
CI & Build	: Maven, Jenkins.
Databases	: SQL, PostgreSQL, Oracle, MS SQL Server, MS Access.
Platforms	: Windows, Linux (Ubuntu).

PROFESSIONAL EXPERIENCE:

Job Title	Consultant (January'20 to Till Date)
Organization	OpenTeQ Consultants Private Limited
Project Description	This project is implemented on existing insurance processing systems by using Guidewire InsuranceSuite. The major objective of the project is to implement a single-core processing system for all core policies, claims processing functions across Personal/Commercial lines.
Tools/Environments	Agile Scrum, Guidewire, Jira, Oracle, Java, SoapUI, Postman, Jenkins, Git, Selenium, JUnit
Job Responsibilities	<ul style="list-style-type: none"> Participated in Agile Scrum development, Sprint Planning, Daily Stand ups, Sprint Review and Retrospectives and reported blockers at the daily stand ups. Primary responsibilities as Configuration stream includes development and customize the complete configuration modules for Guidewire PC. Developed and executed manual test cases of different test scenarios covering all aspects of project functionality. Created automation framework and conducted Smoke, Regression, SIT testing. Participation in defect triages and facilitates in bringing defects to closure. Worked on Assignment, validation, event message and also pre-updated rules and also on the custom batch process.

Job Title	Automation Test Engineer (May'19 to November'19)
Organization	Ta3s Solutions Private Limited
Client	PwC-SDC
Project Description	The project, NG-GBE mainly focused on the CRM dashboard, which monitors customer requests and generate work orders by CSR or supervisor based on the request received from the customer. It is executed by field technician and updated in FSL, which in turn gets updated in IBM Maximo and Salesforce.
Tools/Environments	Agile Scrum, Salesforce, Lightning Components, Selenium, Java, Jenkins, Git, Jira, TestNG
Job Responsibilities	<ul style="list-style-type: none"> Worked intensively with business/development teams, to coordinate manual efforts. Developed and executed manual test cases of different test scenarios covering all aspects of project functionality. Prepared the Test cases, Test Scripts, Test Results for both positive and negative scenarios and mapped the same to functional requirements. Performed root cause analysis for the assigned issues for the existing functionality. Identifying the problems, prioritizing & communicated the bugs to the developers.

Job Title	Quality Analyst (August'17 to July'18)
Organization	Aavis Engineering & Quality Solutions Private Limited
Client	Inhouse Group PTY LTD
Project Description	Trendwise is a dashboard, which is the leading-edge next generation visitor analytics platform that monitors visit behavior to deliver to customers with real-time intelligence on visitor traffic volumes, path, potential, engagement, conversion, and loyalty.
Tools/Environments	Agile Scrum, Selenium WD, Python, PostgreSQL, PyCharm, PyTest, Bitbucket, JIRA.
Job Responsibilities	<ul style="list-style-type: none"> Participated in Agile Scrum development, Sprint Planning, Daily Stand ups, Sprint Review and Retrospectives and reported blockers at the daily stand ups. Worked intensively with business and development teams, to coordinate manual and automated testing efforts for the AUT and in identifying the defects. Developed and executed manual test cases/scripts of different test scenarios covering all aspects of project functionality including positive/negative scenarios. Designed, implemented Data driven framework & automated regression test suite. Conducted Smoke, Regression, System, and Integration, Cross Browser testing. Responsible for providing regular automation test reports to the management.

Job Title	Test Analyst (November'15 to December'16)
Organization	Interop Softwares
Client	National Citizens Service
Project Description	The NCS is a British voluntary personal and social development program. The scope of this

	project is to redesigning it and enhancing the website to meet ongoing requirements.
Tools/Environments	Agile Scrum, Selenium WD, Java, Maven, TestNG, GitHub, Jira, Jenkins, Eclipse.
Job Responsibilities	<ul style="list-style-type: none"> Extensively involved in an agile environment, attending day to day agile activities. Worked intensively, in developing & executing manual TC of different test scenarios covering all aspects of project functionality and identify the TC for automation. Designed the Page object model automation framework based on the BRD. Created automation framework from scratch in Selenium Web driver using POM. Conducted Smoke, Regression, System Integration testing & Cross Browser testing.

Job Title	Software Test Engineer (August'15 to October'15)
Organization	Oxygen 8 Limited
Client	The Epic Apps
Project Description	MTL is a powerful TM tool for Web/Mobile, which provides stakeholders features like Reports, Offline Mode, screenshots attachment etc. makes it easily run and record.
Tools/Environments	Agile Scrum, JIRA, GitHub, Selenium WD, JUnit, Maven, IntelliJ, Jenkins, Java, Appium
Job Responsibilities	<ul style="list-style-type: none"> Worked in an agile environment, attending day to day agile activities. Executed the functional testing of mobile applications. Defining suitable Automation Framework for the Application under Test. Executed the Scenarios, generated the reports, and recorded the results.

Job Title	Test Analyst (June'14 to July'15)
Organization	Oxygen 8 Limited
Client	Barclays
Project Description	The scope of this project is to test the application website and to meet business & customer needs by operating and accepting online/card payments from the docking stations.
Tools/Environments	Agile Scrum, Selenium WD, Java, Maven, JUnit, GitHub, Jira, Eclipse
Job Responsibilities	<ul style="list-style-type: none"> Extensively Worked in an agile environment, attending day to day agile activities. Reviewed BRS/FRD and gathering application knowledge from BA, developers. Preparing test scenarios from Use cases and requirement documents. Designing Automation Smoke/Regression Test packs using selenium, Java. Prepare test summary report including test execution and defect summary.

Job Title	Test Analyst (November'13 to May'14)
Organization	Suryah Limited
Client	Aviva
Project Description	APT is an exciting way for you to take control of your Aviva pension plan. The system provides various modules to automate the entire process like Insurance company/customer information, Agent information, Policy information, Policy payments and Policy claims.
Tools/Environments	Agile Scrum, Selenium WD, TestNG, Github, Java, Maven, Jira, Eclipse, SQL
Job Responsibilities	<ul style="list-style-type: none"> Participated in the E2E test to check the functionality of the entire application. Developed TC for different TS covering all aspects of project functionality. Monitoring the testing process and identifying and logging test failures. Create daily and weekly status reports and update the Test/Product management.

Job Title	Test Analyst (November'12 to November'13)
Organization	Suryah Limited
Client	Tesco
Project Description	When shopping at Tesco or using Tesco services, Club cardholders receive points. Card Holders can also get extra points on special offers and receive one "Green Club card Point".
Tools/Environments	Waterfall, V-model, Java, SQL, HP-QC, Oracle.
Job Responsibilities	<ul style="list-style-type: none"> Developed Manual TC for different TS covering all aspects of project functionality. Involved in designing and maintaining the Regression/Smoke/Sanity Test Suites. Involved in reviewing test deliverables like Test log and Defect log. Performed root cause analysis for all assigned issues for existing functionality.
