## CAREER OBJECTIVE:

To secure a position where I can efficiently contribute my skills and abilities to the growth of the organization and gain real work experience.

## CAREER SUMMARY:

- 2.6 years of total industry experience with 6 months of experience as intern and 2 years experience as associate software engineer.
- Involved in android applications testing.

## WORK EXPERIENCE:

**Sensen Networks Pvt.Ltd, Hyderabad**

**June 2019 – Present**

**Android Testing Team lead**

**Project 1 : GeminEYE**

Client	:	Las Vegas
Domain	:	Smart city solutions
Testing approach	:	Manual
Role	:	QA Engineer

### Overview :

Gemineye is an android application that reads from the phone camera, processes the images and produce license plate results in real time using the most advanced AI solutions. It provides lightweight and low-cost alternative to traditional ANPR systems that require both cameras and video processing units. Also, it does not use any extra power, allowing the solution to be used in various applications such as mobile parking enforcement, fixed mounting, as well as handheld devices by patrol officers.

**Project 2 : SenDETECT – Illegal dumping solution**

Client	:	Brisbane city council - Australia
Domain	:	Smart city solutions
Testing approach	:	Manual
Role	:	QA Engineer

### Overview:

Illegal dumping is a rampant problem and it is going to get worse with the increasing population. Illegal dumping is going to increase the burden on the tax payers. SenDETECT is an end to end solution designed to detect the illegal waste dumping activity by identifying the infringers vehicles, and help city council penalize the lawbreakers. Solution components are on site device and a cloud hosted back office. The result intended by the customer is building a cleaner and safer environment for the citizens living in the neighborhood.
