Gaurav Rajesh Bhale

Senior Analyst - Software Developer

3 Years 6 Months   ✉ gauravbhale06@gmail.com   📱 8856923493

Key Skills

.NET   .NET Core   MVC

Entity Framework   Xunit

ASP.NET MVC   ASP.NET Web API

SQL Server   Angular   HTML

CSS   TypeScript   SSMS

Scaled Agile Framework

Restful Web API Development   Hangfire

Deployment   Code Review

Azure DevOps   Github

Courses & Certifications

- SAFe Practitioner (Valid upto July 2027)
- Angular 16

Personal Details

Date of Birth
06- November-1997

Marital Status
Single / Unmarried

Gender
Male

Address
Near Agnihotri College, New Railway Colony Sindhi Meghe

About Me

Dynamic Full Stack .NET Developer proficient in the trifecta of C#, Angular, and SQL. With a knack for turning complex ideas into streamlined, user-centric applications.

Profile Summary

I am an full stack developer with a proficient experience in .Net , Angular and SQL technology.I have achieved Rank 1 in .Net core Training program conducted by Exceller Academia in Capgemini.I have great communication skills which has always helped in better understanding the requirements and communicate ideas and solutions within the team.I can say in the span over which I am working on this technology,my experience counts more in terms of opportunities I grabbed than the actual number of days I worked..
A user-centric design philosophy underpins my approach to development.I place the end-user at the core of every decision, ensuring that applications are intuitive,accessible, and responsive.By conducting user research and gathering feedback,I continuously iterate on designs to optimize user satisfaction and drive engagement.I stay abreast of the latest advancements in .NET, Angular, and SQL technologies, attending conferences and online courses to expand my skill set.

Education

2019 — **B.Tech/B.E., Sipna Shikshan Prasarak Mandals College of Engineering & Technology Amravati, Amravati**

2015 — **Maharashtra, English**

2013 — **Maharashtra, English**

Work Experience

Senior Analyst - Software Developer
Capgemini

March 2022 - Present

1. Requirement Analysis:
Collaborate with Product Owners and other stakeholders to gather and understand software requirements.
Participate in discussions to clarify and refine requirements for effective implementation.

2. Test-Driven Development (TDD):
Embrace and follow the Test-Driven Development (TDD) approach to software development.
Write unit tests before or concurrently with coding to ensure code reliability and maintainability.

3. Coding and Development:
Develop high-quality, scalable, and maintainable code based on the established coding standards and best practices.
Collaborate with cross-functional teams to integrate software components.

4. Unit Testing:
Design and execute unit tests to verify the functionality, performance, and reliability of the developed code.
Identify and rectify defects through systematic testing.

5. Quality Assurance:
Work closely with Quality Assurance (QA) teams to address any issues or bugs identified during testing.
Ensure that software is delivered with high quality and meets the defined acceptance criteria.

6. Documentation:
Maintain comprehensive documentation for code, processes, and design decisions.
Document and communicate changes made to the codebase.

7. Collaboration and Communication:
Actively participate in Agile/Scrum development processes.
Collaborate with team members, including designers, testers, and other developers, to achieve project goals.

Site Engineer

March - 2022 - November- 2020

BAJAJ SCIENCE COLLEGE, Wardha

Projects

EPV2(Easy Plant Application) .Net, Angular, SQL

23 Months

Easy Plant is a Technip Energies in-house IT tool for Onshore and Offshore Projects to provide support to the management and control of Site activities.
Entire application setup is in Visual studio 2019.Frontend is developed in Angular whereas Backend is developed in (Rest Web Service) used dot net core.
