PROJECTS DELIVERED

MTI:

Project Overview: Market Traders Institute, Inc. (MTI) multinational organization established in 1994 with its headquarters in Orlando, Florida. It a product-based organization. They provide several Online Courses to their user. We helped him to design the solution and support the existing functionality.

Responsibilities:

- In this project, I am leading a team of 4 members and also working on the Development part.
- Managing the Scrum for the internal team.
- Collaborate with the client for the requirement analysis and Status update.

Technologies: Visualforce Page, Apex Class, SOQL, Trigger, Rest API Integration, Batch class, Lightning components.

US BioSkill:

Project Overview: US Bioskills is one of the largest bioskills networks with locations in Atlanta, GA; Cincinnati, OH; Las Vegas, NV and Tampa, FL. This network provides clients the opportunity to reach healthcare professionals in nearly every field such as neurosurgery, orthopaedics, trauma, craniomaxillofacial, cardiology, urology and multiple others.

The ultimate goal is to bring providers and educators together to improve the health and welfare of people across the globe.

The purpose of engagement is to revamp the client's Sales Cloud Salesforce org and automation of the processes using salesforce functionalities, which would include setting up permissions, layouts, fields modification as per the requirements.

Client also wants to track the specimen data in the salesforce and have analytical insight into the major data points via reports and dashboard with personalisation.

Responsibilities:

- In this project, I am leading a team of 2 members and also working on the Development part.
- End to End Development and flow design.
- Managing the Scrum for the internal team.
- Collaborate with the client for the requirement analysis and Status update.

Technologies: Visualforce Page, Apex Class, SOQL, Trigger, Rest API Integration, Batch class, Lightning components.

Chargify:

Project Overview: Chargify is a web service that manages the recurring billing for your subscription-based business. A Chargify Merchant (also sometimes called a Seller) may have many Sites, each of which sells Subscriptions to Products. Subscriptions are purchased by Customers, giving them access to a Product. In this project, they use Salesforce to sync their Subscription from Chargify. They also want to perform some action from Salesforce to Chargify. We also Implement Webhook for performing two processes. We also create an App for this on Salesforce AppExchange.

Responsibilities:

- Developed Apex Classes, REST API integration, Apex Triggers, Visualforce Pages, Webhook.
- End to End Development and flow design.

Technologies: Apex Class, REST API, Javascript, CSS , Force.com Site, SOQL

ACCUZP DQ:

Project Overview: AccuZIP, Inc., a national software company based in Atascadero, CA, provides feature-rich solutions to manage Contact Data Quality, Address Hygiene, USPS Postal Presorting and Compliance and Mail Tracking and Reporting. AccuZIP solutions are designed to be utilized across many industry verticals to streamline, standardize and simplify processes associated with data entry, data management and multi-channel communications. AccuZIP's products and services make it easier for businesses to get their message out to the right people at the right location when they need to most. We also published this app on the AppExchange as a Lightning Ready App.

Responsibilities

- Developed javascript home page components which detect any user activity after it gets activated on the page. Maintaining lighting components for the functionality of Address validation. Custom report for showing all bulk address validations results.
- End to End Development and flow design

Technologies: Visual-force Pages, Apex Class, Apex Trigger, SOQL, Lightning Salesforce, SLDS.

Axis Solutions:

Project Overview: This project was related to custom Quote process. In this project, we develop a custom Quote tool. We have created a custom button and visualforce page on the Account object through which a user can create a Quote and Quote line item. We also develop Process Builder and validation rule for this.

Responsibilities:

- Use of SOQL and Apex Classes

Technologies: AngularJS, Visualforce Page, Apex Class and SOQL.

SCA:

Project Overview: This project comprises of developing Salesforce platform for the **Sparkling Cleaning Agency**, it includes implementing their business logic in Salesforce. **Sparkling Cleaning Agency** is a domestic house cleaning Agency founded in 2005. We have synced their data from her Web-Portal. We have also implement Payment functionality using Stripe. We have integrated with RingCentral Application to send SMS regarding Notification.

Responsibilities:

- Use of SOQL and Apex Classes

Technologies: Visualforce Page, Apex Class, SOQL, Batch classes, Trigger, Rest API, Web services, Workflow, Stripe, RingCentral, Appointment-Plus.

TT Electronics:

Project Overview: This project comprises of developing Salesforce platform for the TT Electronics, it includes implementing their business logic in Salesforce. TT Electronics is a product based organization that focuses on Visual Website Optimizer as well as A/B Testing, the organization has its client all over the world and thus they are migrating to Salesforce to increase their productivity.

Responsibilities:

- Use of SOQL and Apex Classes

Technologies: Visualforce Page, Apex Class, SOQL, Batch classes.

TECHNICAL EDUCATION

- B.TECH: Laxmi Devi Institute Of Engineering & Technologies, Alwar, Rajasthan.
