PROFESSIONAL SUMMARY

With 2+ years of experience as a Salesforce Developer, I specialize in Apex, LWC, Salesforce Flows, Javascript, and Agile methodology. I enjoy collaborating with cross-functional teams to deliver cutting-edge solutions that meet business needs. Strong problem-solving abilities combined with a commitment to continuous learning.

TECHNICAL SKILLS

- Synchronous & Asynchronous Apex
- LWC
- SOQL & SOSL
- Formula & Validation Rules
- Users, Profiles, Permission Sets & Layouts
- Apex Trigger & DML Operations
- Test Class, Custom settings
- Salesforce Flows & Approval Processes
- Reports & Dashboards
- Objects, fields and Relationships

PROFESSIONAL EXPERIENCE

Cloud Analyst, Bluepineapple   06/2021 – present | Pune

Drive Marketplace

Description: The Drive Marketplace project was to replace the legacy system with the new Lead Management System (LMS). I am responsible for developing & customizing solutions that meet unique needs.

Responsibilities:
- Maintained and developed custom objects, custom fields, custom buttons, and page layouts.
- Developed and implemented a Batch Apex job to delete a large number of Blue Log records.
- Developed and implemented a Schedule Apex job to execute Batch Apex classes on a daily basis.
- Implemented custom Triggers to address complex validation requirements.
- Created Apex classes and Test Classes.
- Created Validation Rules to ensure data accuracy.
- Built Record Trigger Flow and worked on Screen Flow.
- Created a Console app and prepared comprehensive technical documents, including a user guide.
- Participated in code reviews and performed unit test to ensure high-quality code and system stability.

Agile Kanban

Description: The Agile Kanban app, similar to JIRA, is a Salesforce application designed for tracking projects, stories, tasks, and bugs. It features a Planning Poker game for estimating story points, promoting collaborative decision-making. I was responsible for the development, planning sprint, and creating development tasks and stories.

Responsibilities:
- Developed a Lightning Web Component (LWC) for the UI of the App Configuration page, enabling users to customize the color and font of various elements within the app's interface.
- Maintained and developed custom objects, custom fields, custom buttons, and page layouts.

- Created Flows, and Validation Rules.
- Developed and created a Managed Package for the app, bundling custom components and functionality.
- Created technical documentation including Admin and User guides.

Borr Drilling

Description: The project involved the migration of their system to Salesforce, encompassing the implementation of the Sales process and ensuring seamless adoption and integration. I was responsible for the development & implementation of assigned user stories.
Responsibilities:
- Collaborated closely with senior developers to ensure seamless alignment with business requirements.
- Created validation rules to ensure data accuracy.
- Implemented custom Triggers to address complex validation requirements.
- Created technical as well as training documents.
- Contributed to the identification and resolution of software issues, ensuring optimal performance and functionality.
