Professional Summary

As a Full Stack/MERN Stack Developer with 6+ years of experience, I have specialized in the MERN stack, gaining expertise in Node.js, Express.js, Nest.js, React.js, as well as MySQL and MongoDB for databases. I am experienced in developing both traditional REST APIs and GraphQL, with a thorough understanding of REST API architecture. Throughout my career, I have demonstrated my ability to work effectively in fast-paced, collaborative environments while delivering high-quality results. With my problem-solving skills and dedication to excellence, I am confident in my ability to meet the unique needs of each project.

Skillset

- HTML5
- CSS3
- Bootstrap
- Javascript
- Typescript
- JQuery
- JSON
- Git
- Bitbucket

- Node.js
- Express.js
- Nest.js
- React.js
- Redux.js
- Redux Toolkit
- GraphQL
- MySQL
- MongoDB

- Waterfall & Agile
- Core PHP
- Laravel
- Codeigniter
- WordPress
- Whmcs
- Wisecp
- Blesta

Work History

Jupitice Justice Technologies Private Limited   Chandigarh– India
Senior Software Engineer   April 2023, Current

- Designing, developing, and implementing scalable and high-performance web applications using Node.js, Express.js, and React.
- Building user-friendly and responsive user interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and accessibility.
- Designing and developing server-side logic using Node.js and Express.js, handling HTTP requests, creating RESTful APIs, and integrating with databases like MySQL.
- Designing and implementing database schemas, writing efficient SQL queries, and ensuring data integrity and performance optimizations.
- Working closely with product managers, designers, and other developers to understand project requirements, contribute to technical discussions, and provide input on architecture and design decisions.
- Participating in Agile development processes, including sprint planning, daily stand-ups, sprint reviews, and retrospectives. Collaborating with the team using tools like Jira to manage and track project tasks and user stories.

- Identifying and implementing performance improvements, such as caching strategies using Redis, optimizing database queries, and applying best practices for code efficiency.
- Using Git and GitLab for version control, collaborating with the team using GitLab for code reviews and repository management. Participating in continuous integration and deployment processes.
- Creating and maintaining technical documentation, including API documentation, code documentation, and project-specific guidelines for future reference and knowledge sharing.

Offshore IT Services Private Limited (A TechRBM Company)   Mohali– India
Software Engineer   July 2022, Mar 2023
- Developed full-stack web applications using the MERN stack, including the front-end using React.js, back-end using Node.js and Express.js, and database using MongoDB.
- Created RESTful APIs to integrate with front-end applications, enabling data exchange between the client and server.
- Designed and implemented scalable and efficient database structures using MongoDB, ensuring data integrity and security.
- Optimized web application performance by identifying and resolving bottlenecks in the application, such as slow loading times or inefficient queries.
- Collaborated with a team of developers, designers, and project managers to ensure successful project delivery, including code reviews, testing, and deployment.
- Integrated third-party APIs and libraries into web applications to add functionality and improve user experience.
- Used version control tools such as Git to manage code and collaborate with other developers.
- Worked with agile methodologies to ensure timely delivery.
- Troubleshooting and debugging issues in the application, including fixing bugs and implementing patches.

Skynox Tech Private Limited   Jalandhar – India
Team Lead   July 2019, June 2022
- Participating in the design, development, testing, and deployment of software solutions using Full/MERN stack technologies.
- Managing a team of developers to ensure project deliverables are completed on time..
- Responsible for client communication, task planning & distribution, interviewing candidates, and intern training.
- Led development of web applications from concept to launch, ensuring high code quality and adherence to project specifications.
- Providing technical guidance and mentorship to team members, assisting with problem-solving and code reviews as needed.
- Conducting performance evaluations and providing feedback to team members, identifying opportunities for training and development.
- Communicating with other teams and departments to coordinate work and ensure smooth project delivery.
- Staying up-to-date with emerging trends and technologies in Full/MERN stack development, and making recommendations for process improvements or tooling upgrades.
- Being responsible for the team's productivity and overall success, while fostering a positive and collaborative team environment.
- Optimized database queries and data structures for improved application performance and scalability.

GRDJ Technology (UK Based Company)   Jalandhar – India
PHP Developer   Aug 2017, July 2019

- Worked on Web Application development using PHP, HTML, CSS, and JavaScript.
- Understanding development requirements.
- Writing back-end code and building efficient PHP modules.
- Collaborated with the design team to implement user interfaces and ensure consistent user experience across the application.
- Troubleshoot application and code issues to ensure smooth functioning.
- Collaborated with the team to ensure timely delivery of the project.
- Maintained the codebase and documentation to ensure future scalability and maintainability of the application.
- Updated and altered application features to enhance performance and user experience.
- Utilized version control tools such as Git to manage codebase and track changes.
- Stayed up to date with the latest industry trends, technologies, and best practices in web development.

Zeal Infosoft   Jalandhar – India
Full-time Intern   Jan 2017, Jun 2017

- Completed a 6-month PHP internship on a full-time basis for a college project.
- Learned and implemented various technologies including MySQL, JavaScript, HTML5, CSS3, and PHP.
- Gained hands-on experience in project development, testing, and deployment.
- Improved problem-solving skills and ability to work independently and as part of a team.

Education

- M.S.C IT Passed with 63% marks from Lyallpur khalsa college, Jalandhar in 2019
- B.C.A Passed with 60% marks from GNDU regional campus, Jalandhar in 2017

Languages Know

English, Hindi and Punjabi

Hobbies and Interests

- Tracking/Traveling
- Reading: Browsing and reading articles, e-books, and blogs online.
- Online courses: Taking online courses to learn new skills or expand knowledge on a particular subject.
