OBJECTIVE: Highly skilled and innovative web developer with a strong background in React.js, Next.js, TypeScript, and an unwavering commitment to delivering exceptional web experiences. Seeking to leverage my expertise in both front-end and back-end technologies, along with my proficiency in various database systems and AWS Lambda, to contribute to a dynamic development team and create cutting-edge, scalable web applications that exceed user expectations and drive business success.

SUMMARY:

- Highly skilled and innovative web developer with a versatile skill set in front-end and back-end technologies.
- Proficient in React.js, Next.js, TypeScript, HTML, CSS, Sass, Bootstrap, JavaScript, Node.js, and Express.js.
- Extensive experience in developing and maintaining responsive web applications, ensuring exceptional user experiences and increased customer engagement.
- Strong expertise in database technologies, including MySQL, PostgreSQL, Firebase, MongoDB, SQLite, AWS DynamoDB, and Amazon DocumentDB.
- Adept at using AWS Lambda for serverless development, reducing infrastructure costs and enhancing scalability.
- Proven ability to design and implement visually appealing user interfaces, resulting in consistent and attractive front-end experiences.
- Excellent problem-solving skills, with a track record of collaborating effectively in cross-functional development teams.
- Certified AWS Developer - Associate, demonstrating proficiency in cloud-based development.

- **Database Technologies:** MySQL, PostgreSQL, Firebase, MongoDB, SQLite, AWS DynamoDB, Amazon DocumentDB
- **Serverless Frameworks:** AWS Lambda
- **Development Tools:** Visual Studio Code, Git, GitHub, Jira, Postman, Trello, Bitbucket
- **Other:** Azure, Microsoft Teams, Windows, Linux

Soft Skills

- Problem Solving
- Critical Thinking
- Communication
- Analytical
- Time Management
- Teamwork
- Strong Attention to Details

EXPERIENCE

Company: Rejoice Hub solution LLP **July 2019 – Present**

Position: Team Lead and MERN Stack Developer

- A dedicated and experienced React.js developer with 4+ years of hands-on experience in building dynamic, user-friendly web applications. Proficient in Node.js with 1 year of experience. Strong problem-solving skills, a passion for clean code, and a track record of delivering high-quality software solutions.
- I initially embarked on my professional journey at Rejoice Hub solution Start, where I started as a trainer, and over the years, I've had the privilege to grow within the organization. Today, I hold the esteemed position of a team lead, responsible for guiding and overseeing a highly skilled and dynamic team.
- Simultaneously served as a MERN stack developer and team lead, overseeing a group of 8 members, while actively participating in the development process.
- Led the design, development, and maintenance of web applications using the MERN stack, including MongoDB, Express.js, React, and Node.js.
- Provided technical guidance and mentorship to team members, fostering their skill development, and ensuring adherence to best practices in MERN stack development.
- Collaborated closely with cross-functional teams to define project requirements, scope, and timelines, ensuring alignment with organizational goals.
- Presented innovative solutions and project updates to stakeholders and clients through engaging presentations, strengthening communication and client-facing skills.
- Led problem-solving sessions within the team, fostering a culture of collaboration and innovation to address complex technical challenges.
- Introduced process improvements that streamlined project development, resulting in quicker project completion and improved efficiency.
- I am deeply committed to driving the success of both my team and the organization as a whole, and I look forward to the new challenges and achievements that lie ahead in this exciting phase of my career.

EDUCATION

Bachelor of Engineering in Computer Engineering **July 2015 – May 2019**

Bhagwan Mahavir College of Engineering & Technology, Surat, India

Relevant courses: HTML, CSS, JavaScript, PHP, Python, Data Mining and Business Intelligence, .NET Technology, Web Technology, Advanced Java, Cyber Security

PROJECT LIST

✔ **SMS-Magic (React.js, Sass)**

SMS-Magic's business text messaging platform is renowned for its top-rated performance in Marketing, Sales, and Support. By seamlessly integrating with leading CRM systems like Salesforce and Zoho, our platform transforms these CRMs into powerful conversational tools, enabling businesses to engage and communicate with their customers more effectively.

✔ **Eventitude (React.js, Sass)**

Eventitude is a comprehensive online platform dedicated to simplifying the process of creating, managing, and attending events of all types.

Whether you're organizing a conference, workshop, seminar, festival, or any other gathering. Eventitude offers a range of features to make your event planning experience seamless and enjoyable.

✔ **Autopilot / Brain-IO (React.js, Typescript, Sass)**

Developed a project with functionality of managing tasks for the employees in a company where managers can create tasks, assign tasks and delete, update tasks in websites and employees can also manage their assigned tasks.

✔ **Virtual Production for Film, TV & Advertising | Vū (React.js, Sass)**

Vu is the film production software that goes with you everywhere. Upload and share production documents and media with ease. Upload your film screenplay, storyboards, location photos, invoices, release forms, crew deal memo and other documents securely with encrypted access for added measure.

✔ **Nanha Munna – Story Management Technology (React.js, DynamoDB, Nodejs, Sass)**

Create a web platform that allows authors to upload stories via Excel files and provides readers with the ability to explore content in multiple languages, organized into seasons and episodes. Users can personalize their reading experience by creating their own avatars and names, making it truly engaging and unique.

✔ **Shree HKJ (Tool for CAD) (React.js, Nodejs, MongoDB, Sass)**

Develop a CAD and designer task tracking and assignment management system. This platform streamlines project management by enabling seamless tracking of design tasks, assigning responsibilities to team members, and ensuring efficient progress monitoring and collaboration among design teams.

✔ **Ecommerce site Lotus/Shree Hkj (user and admin panel) (React.js, Node.js, MongoDB, CSS)**

Develop a B2B platform that connects businesses, streamlines transactions, and facilitates efficient collaboration within the professional ecosystem.
