Responsibilities: -

- Implemented websites, mobile applications, and landing pages from concept through deployment.
- Write neat, semantic, indented, and thoroughly commented code for HTML, CSS, Bootstrap, JavaScript, ES5, and ES6.
- I worked on Financial Cloud in the Penfed Project and delivered multiple UI stories.
- Utilized Salesforce Lightning Design System (SLDS) and Standard Web-based technologies or custom UI needs.
- Built reusable UI components and pages with the lightning component framework.
- I have experience in working with community cloud.
- Also create UI using SLDS classes.
- Worked with mobile team to create optimized UI of salesforce pages for Mobile App.
- Good work in writing SQL queries with major Relational Database.
- Design and implementation of the overall web architecture.
- Assist back-end developers with effective implementation of front-end templates, HTML, CSS, and JavaScript to develop e-commerce websites.

- Front End Development - Expertise in front-end technologies, including JavaScript, CSS3 and HTML5, and third-party libraries such as jQuery and LESS.
- Standardized all output with a new, responsive, mobile-first approach and strategy.
- Assessed UX and UI designs for technical feasibility.
- Developed standard and ad-hoc reports in graph format as required.
- Collaborated with product team members to implement new feature developments.
- Created efficient and reusable front-end systems to drive web applications to the marketplace.
- Worked with designer, product manager, and developers to achieve design goals and directly helped advance the organization's design system documentation.
- Advised teammates on the technical feasibility of client designs.
- Develop illustrations, logos, and other designs using software or by hand.
- Use the appropriate colors and layouts for each graphic.
- Amend designs after feedback.
